LEW BONN CO

MINNEAPOLIS - ST. PAUL
MINNESOTA

THE COMPLETE STOCK RADIO WHOLESALERS

TO OUR CUSTOMERS

LEW BONN President

We are constantly striving to give better service and a larger dollar value. We realize this must be done to justify your business. The larger dollar value we are giving because of our greater purchasing power, due to increasing demands from you. Our Customer, of staple radio merchandise guaranteed by nationally recognized manufacturers and backed by our policy of satisfaction, or Money Cheerfully Refunded.

We realize to give good service we must have employees working co-operatively to give their best; intelligent, pleasant, courteous, and always willing to do the unusual.

Most of our personnel have been with us over a period of time and are happy with their association and willing to give you just such service if you will give us this chance.

Our newly arranged stock and showroom with 55 feet of plate-glass showcase frontage, allows you plenty of room to see the actual equipment and parts while making your purchase from our technically trained counter staff.

Our mail order department and city desk is supervised very ably by one of our oldest employees, figured in years of service with our company, who analyzes and double checks your orders.

May I make a personal appeal to invite your criticism of any purchases or shipments, as only through your constructive complaints and suggestions can we correct weaknesses in our service. If we do not have what you want, we will get it for you if obtainable.

We offer you our Annual Catalog for another year with the wish that it will guide you to a higher level in the radio industry, based upon a more profitable foundation.

BOYD PHELPS Sales Engineer W9BP

Few men, if any, have had experiences that closely parallel those of Boyd Phelps. Starting with wire-less a quarter century ago, he has closely followed the art and many times taken the leadership in making important advancements. Some unbiased observers claim he was responsible for the start of short wave development in his classical experiments during 1920-1924 which began at Minneapolis and continued in Hartford and New York. For this he received a Gold Medal in 1933. Other adventures include editing QST, pounding brass and teaching radio in the navy during the war, establishing first communication on 5 meters and $\frac{1}{2}$ meter, first amateur television, lowest wave regenerative oscillator, highest precision frequency measurements, etc. He has been a speaker at dozens of ham conventions since the first at Chicago in 1921, and his writings have been translated and reprinted in many foreign countries. His biography appears in "Who's Who in Engineering" (1925), "Young Men of America," etc.

"BeeP" (as he is called by his numerous friends) has held nearly a score of calls and W2BP-W9BP are his at present, being also similar to his initials. The W9BP station contains five regular receivers covering 3 to 30,000 meters, a KW transmitter on 80 meters, a half KW line frequency control five meter unit a 250 watt crystal transmitter on 5-10-20, a modulator delivering 600 watts of audio to any of these, a 15 watt battery operated emergency portable on 40-80 meters, and a 12 watt five meter mobile station in the car.

While he calls the above adventures rather than experience, he has held many responsible positions as president, chief engineer, or consulting engineer with several large eastern radio factories and has a keen understanding of sales angles as well as the problems of the serviceman.

WARD JENSEN General Manager W9TLE

Here's Our New Catalog! and with the exception of Delco Radio and Webster-Chicago P.A. equipment, all prices shown are NET. We believe you will agree with us, that the purpose of our book is to tell you what we have to sell and how much it costs. We DO NOT want you to drive business away by charging too much for your work or the merchandise you sell. A man is entitled to a FAIR PROFIT and "the laborer is worthy of his hire," but do not think for a minute that fictitious prices make for repeat business.

We realize that if you are successful it means business for us. We are therefore going to do everything in our power to see to it that you are a success. Our new mailing list will be bona fide and we invite your comments. If you care to see who gets our catalog in your town just drop in on us here in Minneapolis some time and we'll show you who is on our list.

We do not believe you should show our catalog to your customer. Of course, in the past, when you showed him an article, the price shown was high and if by accident he saw it later, in a competitive catalog—what would that make you?

BE FAIR—Charge normal prices for your work, and RECOMMENDED LIST PRICES for your parts and business will be better for you.

How do you like our book? Ward Jensen has been a serviceman for many years and we know he anticipates your problems and will work with you to see that you get a square deal.

We will be glad to have you incorporate a couple of lines on your first order, telling us about it.

FRED KENNEDY Manager St. Paul Store

Our new St. Paul store is under the capable direction of Fred Kennedy whose experience and ability admirably enable him to serve you. If its too far over to Minneapolis, drop in on Fred, who will see that you get what you want at 506 Robert St., St. Paul.

Business is better in St. Paul this season. "Kadette's" are selling fine and the new "Starline" and Delco models sure leave nothing to the imagination. New tubes and advanced circuits are going to make the Serviceman hop. Better let us show you some of the new and latest test equipment when you come in.

Both conventions are going to be held in St. Paul this year and we intend to show you that St. Paul is definitely on the map. The plans at present are to hold the "Northwest Radio Serviceman's" and the "Mid American and Dakota Division" A. R. R. L. convention at the Lowry Hotel. Watch for announcement of the time and place in "QST" and the "National Technician." Don't fail to look us up as we'll be there "with bells on." Last minute word has it that the "Mid American" will be held on May 21-22-23, 1927. Let's Go!

TRAINED RADIO MEN TO SERVE YOU

THE LEW BONN CO. DISTRIBUTES

INTERNATIONAL KADETTE

FRANCHISE DEALERS ON KADETTE

We are not showing the Kadette line in the catalog this year as we wish to keep it as an exclusive proposition for our dealers. This nationally advertised line includes models which range in price from a 3 tube AC-DC at \$10.00 to the most exquisite console at \$69.50, enabling us to set you up to meet the severest competition on the market.

Delco is also being held open to dealers and while they are shown on our pages we show only list prices. Write us for particulars.

The Lew Bonn Co. Time Payment Offer

The Lew Bonn Co. Time Payment Offer is open on any merchandise we carry. Contracts of less than \$75.00 will be financed for as long as 6 months and contracts of between \$75.00 and \$150.00 may be carried as long as 10 months while contracts over \$150.00 may be extended to 12 months if necessary. Interest at the rate of 8% is charged if the balance owed is \$150.00 or over. Smaller contracts are charged for at the rate of \$1.00 per month for the term of the contract and the down payment can be anything you care to give us, preferably 20% or better.

To illustrate:

De Luxe Model Tester.....	\$99.50
Down Payment.....	19.50
Balance	\$80.00

Carried for 10 months will be **\$9.00** per month.

Or—Balance Due.....**\$150.00**

Interest for 10 months at 8%.... **10.00**

\$160.00

In 10 monthly installments is **\$16.00** per month.

Or in 6 monthly installments is **\$26.00** per month.

To obtain credit on this plan, write us for an application form to fill out and return to us along with your order and down payment. We will send you a contract form to be signed after your references have been approved and immediately upon the return of this contract, properly signed, we will ship your order.

Clough Brengle Plan

Time payment prices on Clough Brengle equipment are shown below, and it will be necessary to write for a credit reference blank which must be filled out and returned to us, together with your down payment. (This will be refunded if credit is not approved.) A contract form will then be sent you to be signed and returned to us. Upon approval of this contract by Clough Brengle the unit you ordered will be shipped you.

Model	Price	Down Payment	Mos.	Payments
OC-A	\$20.95	\$4.50	7	\$4.20
99	43.90	5.00	10	4.44

WATT****SETCHEL-CARLSON
SOUND SYSTEMS****15
WATT****\$41.70****PORTABLE 15-WATT AMPLIFIER
COMPLETE WITH TUBES AND TWIN SPEAKERS****MODEL****PA15****MODEL PA15—15-WATT A.C. PORTABLE**

Model P. A. No. 15 is a fifteen watt twin speaker amplifier, as shown above. It is modernly engineered to use the new crystal or velocity type microphone, which insures true reproduction of sound.

Temporary Installations—Makes a perfect portable sound system due to its compactness and individuality. The two speakers, when fastened together, make an ideal dust-proof carrying case. The amplifier unit is also dust-proof when front slide cover is in place.

Permanent Installations—Two separate 10-inch speakers are used for adequate coverage of large areas. The amplifier, which is a separate unit, can be placed in the most convenient location for controlling and operating.

General Features—

- Two separate, individually controlled microphone input circuits.
- Phonograph or radio input circuit for mixing voice with musical background.
- 35-foot cord with each speaker,
- Full range tone control.
- High gain for crystal or velocity microphone.
- Tubes used: 3 No. 6F5's, 1 No. 42, 2 No. 2A3, and 1 No. 5Z3.

Model PA15.

List, **\$69.50.**

Net Price (with Twin Speakers).....

\$41.70**MODEL PA6—14-WATT 6-VOLT PORTABLE
OR PERMANENT**

Model P. A. 6—Is an 8-tube, 14-watt amplifier designed to operate most efficiently on a 6-volt battery. The low drain of 10 amperes is accomplished by using new tubes and design.

For Permanent Installations—On sound trucks, etc., the use of the bell type speaker, as shown above, is recommended.

For Portable Use—Two 10-inch speakers in leatherette cases are used. See picture on reverse side of this page.

The P. A. 6 is furnished with one Bell Type speaker or two speakers in leatherette carrying case—your choice of either equipment at the same price.

General Features—

- Crystal, velocity or ribbon type microphones can be used, and are recommended.
- Full range tone control.
- Radio and phonograph input circuits.
- Twin power supply, employing two vibrators, two transformers, two rectifiers, assuring efficient and dependable operation.
- Tubes used: 2 No. 6F5's, 2 No. 37's, 2 No. 6A6's, and 2 No. 6X5's.

METAL TUBES—STREAMLINE CABINETS—HI-GAIN CIRCUITS

THE "STAR-LINE" SPIN-A-DIAL STATION SELECTOR

A spinning fly-wheel continues to rotate the pointers after you let go of the knob! Clock dial logging makes it possible to come back to a station with ease and precision. The 11-in. oval dial finished in gold letters on black background, plus the beautiful hammered bronze escutcheon, set these receivers in a class by themselves as years in advance of all others.

11-TUBE A.C. CONSOLE

This modern ELEVEN-tube receiver with its full 12-in. dynamic reproducer behind the front panel of one of 1937's most attractive streamlined consoles, offers you an artistic full-toned receiver that will bring into the room all the realistic qualities of studio productions plus the ability to tune the four corners of the world. **Truly Superlative Reception!** Cabinet front panel of beautiful curving butt walnut, contrasting pilasters. Four wave bands, 16.5 to 2,000 meters, covering "Weather," "American," "Police," and "Foreign." Has variable tone control and full automatic signal strength compensation.

OUTSTANDING 6-VOLT PERFORMANCE

New, Permanent Magnet Dynamic Speakers Used in Delco Battery Models Consume No Current.

The permanent magnet dynamic speaker is the latest engineering development. This brand new permanent magnet dynamic speaker, never before used, will give the owner of a battery set the ultimate in tone performance. This speaker gives tone quality comparable to the electrodynamic type and consumes no current. It is the biggest improvement in speakers since the invention of the dynamic speaker.

"What appeals to me most in these new Delco Radios is their surprising ability to carry all the overtones to the radio listener—those vague, fleeting 'will-o-wisp' intonations which make the actual hearing of a beautiful instrument so much more satisfying than reception over the ordinary radio."—Rubinoff.

DELCO AUTO RADIO STAR-LINE

6-TUBE STAR-LINE AUTO RADIO

One of the easiest auto radios to install that is built! Fits all cars and mounts with a single bolt. Dimensions: $7\frac{1}{2} \times 7 \times 8\frac{1}{4}$ in., leaving plenty of room for heater, etc. Tailor-made controls fit all cars. Only one antenna connection, only one battery connection. No spark plug suppressors necessary. 10 KC selectivity. Variable tone control. Housed in sturdy, wrinkle-finished metal case. Patented antenna circuit allows sensitivity of $\frac{1}{2}$ microvolt. Fully RCA and Hazeltine licensed. Uses 3-gang, rubber-floated condenser with noise-reducing preselector stage guaranteeing reception unexcelled by much higher priced receivers. Plug-in provision is made so an extra speaker for over head or back of front seat may be added.

FLEXIBLE SHAFTS

Shafts and casings may be had with any of the fittings shown in the illustration at the same price. In ordering give the shaft number and length desired.

18 inches long.	Net, each....	\$0.48
20 inches long.	Net, each....	.51
24 inches long.	Net, each....	.57
30 inches long.	Net, each....	.66

HOW TO DETERMINE RATIO REQUIRED

First, open the condenser and then count the turns of the flexible shaft required to bring rotor to the fully closed position. Multiply this figure by two to obtain the gear ratio in terms of 360 degrees. Example: If your flexible shaft makes eight complete revolutions to turn the rotor from the open to the closed position the gear ratio is 16 to 1 and you need No. 254 or No. 604 control.

INFORMATION ON DIRECTION OF ROTATION

Tell us whether condenser closes left or right.

CONTINENTAL CARBON SUPPRESSORS

CONTINENTAL Suppressors have been subjected to years of laboratory development and actual road service. They effectively remove noise interference from spark discharge at the plugs and high-tension distributor—yet do not in any way affect the motor car ignition system.

They have mechanical strength to withstand the most severe service. The resistance value has been scientifically determined and is not changed after years of the most adverse conditions. Sparking across the terminals is eliminated by careful shaping of the electrodes and cases.

Net price, each (any type).....\$0.18

AUTO RADIO SUPPRESSORS

IRC Suppressors.

Built for the Longest Service On the Toughest Jobs

Type MS

Type MD

Type MC

Type MCA

Type MCB

Type MS—Standard for spark plugs on most cars.

Type MD—Distributor suppressor.

Type MC—Cable—where cable may be spliced.

Type MCA—For recessed plugs—Buicks, etc.

Type MCB—Extremely light—for Fords.

All types. Price each.....\$0.18

Auto Radio Antennas

WARD "DUAL MARVELWAVE"

● The Best Buy on the Market! All the benefits of Ward engineers' eight years' experience in building auto aerials, at a price that meets all competition. Same no-drilling quick-installation features as all other Ward aerials. Rubber insulated—rustproof finish.

Model 2MW—Net price. \$1.65

SINGLE MARVELWAVE

Model 1MW—Net, each. \$0.90

WARD "RUBBER SEALED" STREAMLINE

The most efficient aerial for one running board, 10-minute installation by means of Ward's "magic brackets."

Model 4RC with lead wire. \$1.77

WARD "MAGIC-SKI" AERIAL

- No Drilling.
- Quick Installation.
- Permanent Construction.
- Approved by Leading Engineers.
- Efficient Under All Weather Conditions.
- No Fading—Non-Directional.

The scientific combination of the bracket and antenna reduces capacity to car to new low levels, giving added ground capacity, which is directly responsible for such outstanding high efficiency and performance.

Model 2-Ski, dual. \$2.10

Model 1-Ski, single. 1.20

WARD LOW LOSS LEAD WIRE

Weather-Proof—Shielded

Model No. AL-66—66 in. long. Net price. \$0.45

Model No. AL-36—36 in. long. Net price.36

LYNCH AUTO ANTENNA

LYNCH AUTO KIT A-1

Especially designed for Turret Top cars. Increases volume—reduces interference. Installs easily beneath car. Kit consists of 20 feet Lynch "Hi-Mo" auto antenna wire (42 strands— $\frac{1}{8}$ in. diameter), rear axle insulator assemblies, flywheel housing insulator assembly with tension adjuster, necessary connectors and 10 feet special lead-in wire. \$2.10

LYNCH KIT A-2

A coupling system with a matched impedance transmission line which will reduce interference on any existing installations. It will raise volume on any present installation 100% to 300%. Kit A-2 consists of one Lynch auto antenna impedance matching transformer, one auto radio receiver impedance matching transformer, and 10 feet Lynch No. Stat shielded transmission line with hardware for connecting. \$3.00

LYNCH DE LUXE KIT A-3

Combines all of the materials in Kits A-1 and A-2. Kit A-3. \$4.80

DOUBLET AUTO AERIAL

A real noise-reducing car antenna. Comes complete with mounting brackets and hardware. No. 4345 \$1.10

RCA Dipole Auto Antenna

Constructed of metal tubing coated with durable insulation, 48 ins. long, 6 ins. wide. The noise-reducing Dipole in operation acts as a counterpoise with the car acting as the aerial. Adjustable. Complete with shielded lead-in, bayonet-type plug and all hardware. No. 9605—Net \$1.55

Fine copper mesh moulded into rubber. Insures greater volume—easy to install. No. 325—Complete with hardware. . \$1.65

TRIANGLE LO-LOSS AUTO-RADIO AERIAL

An extremely popular type of undercar aerial—good pick-up. 20 feet of heavy phosphor bronze cable together with durable lead-in and all necessary hardware. No. 4342—Net \$0.95

EVEREADY

RADIO BATTERIES

EVEREADY

Each new Eveready "B" and "C" battery is equipped with a 3-hole socket and a removable plug. Wires from the set connect to the plug. Put the plug in the battery socket—as easy as putting in a radio tube—and the correct connections are all made. Fool-proof! No wiring troubles! Can be used on old radios as well as new. The batteries marked * have this wonderful new feature.

Complete

As a power supply for field coils, exciter lamps, and relays, or
in the laboratory, for supplying various low D.C. voltages by
simply using rheostat in one side of the A.C. cord. Eliminates
storage batteries and battery chargers. Prevents the possibility
of spoiling a sale because of a run-down battery. Operates the
set at maximum efficiency at all times. Delivers pure direct
current at the correct voltage for the proper operation of any
auto radio set. Equipped with full-wave dry-disc type rectifier
assuring noiseless, interference-free operation and extreme long
life and reliability. Fully automatic and fool-proof.

Cabinet is of heavy gauge metal having attractive black
wrinkled finish. Size 7½ in. x 7½ in. x 5 in. Shipping
weight, 20 lbs.

**GENUINE**

- TREMENDOUS PUBLIC ACCEPTANCE
- UNIFORM PERFORMANCE
- SEALED CARTON PROTECTION

THE QUALITY LINE

RAYT
4 PILLAR

Radio's Highest Quality

Longest Life

Most Sturdily Constructed

RADIO TUBES

Raytheon's 4-Pillar construction is tried and proved. Jars and jolts that ruin all other makes of tubes do not affect Raytheon 4-Pillar radio tubes. Raytheon 4-Pillar tubes are used in a large majority of radio-equipped police cars and also are the favored tubes for use in airplane radios where tubes are subjected to heavy vibrations. Raytheon tubes are supplied as original equipment by more manufacturers of auto radios than any other make—because they have learned that Raytheon 4-Pillar construction means better performance and less trouble. You can prove, to all tube customers, that Raytheons are better than other tubes by demonstrating the added volume and the clarity of reception when installed in their radios. Then clinch the sale by pointing out the advantages of Raytheon's 4-Pillar construction.

A BETTER

Raytheon Radio Tubes are divided into three groups—Group 1, Group 2, Group 3. All Group 1 tubes are fast sellers and are guaranteed for six months. Group 2 tubes are medium fast sellers and are guaranteed for nine months. Group 3 tubes are the slowest sellers and are guaranteed for one year. You will find the group number of each tube listed right with each tube. Raytheon's guarantee includes everything but broken glass and burn-outs and this guarantee is backed 100% by the Lew Bonn Co. The guarantee period is de

RAYTHEON

RADIO TUBES

to sell the best.

WITH BIG DEALER DISCOUNTS

GUARANTEE

Determined by the coding on the code label that is attached to each Raytheon Tube and is computed by adding six, nine or twelve months to the code date. The code date consists of two or three figures. The first, or first two, indicate the month of shipment and the last, year of shipment. For example, "74" would indicate shipment in July, 1934. The Lew Bonn Co. is the largest distributor of radio tubes in the Northwest so you are assured of a large, fresh stock of tubes at all times.

RAYTHEON METAL ENVELOPE RESISTANCE TUBES

Metal envelope similar in appearance to 5Z4—Capacity 0.3 mpere. Raytheon Resistance Tubes replace resistance line cords in A.C.-D.C. receivers and provide, in types equipped with a tap, voltage for the operation of one or two dial pilot lamps.

MORE PROFITS

A Cleaner Business

LESS TROUBLE

Read This!

The sale of radio tubes should constitute 40 to 50% of your sales volume. Therefore, you should be sure that the radio tube line that you are handling offers you the maximum profit with the least trouble. Raytheon radio tubes are nationally known and have very good consumer acceptance, together with the strongest sales feature possible—4-Pillar construction. Look over the many free sales helps we offer you. Look over the many items of test equipment that you can secure at great savings—see page 8 for full details.

5 IMPORTANT FEATURES!

1. A definite guarantee.
2. Raytheon quality is unexcelled.
3. Nationally advertised real consumer acceptance.
4. Complete selection—a tube for every set.
5. 4-Pillar construction. The only tube having this patented feature.

LOW-VOLTAGE HIGH CAPACITY DRY ELECTROLYTICS, TUBULAR CONTAINERS

Strong

**Wire Leads.
Hermetically Sealed.**

Small, compact, efficient. Equipped with wire leads. Polarity clearly indicated on cartridge. Complete range of voltages and capacities for every need.

DWARF MIDGET DRY ELECTROLYTIC CONDENSERS

TYPE JR

Dwarf Midget Dry Electrolytic
Condensers

Tiny Silver Coated Cardboard Containers
Equipped with Color-coded Flexible Wire
Leads and Mounting Feet
Compact, dependable and inexpensive.
Excellent electrical characteristics. For
use in limited space and tight-squeeze
radio service jobs. Adequately protected
against humidity. No need for an endless
variety of special expensive exact dupli-
cate replacements.

200 V. D. C. Working Voltage—250 V.

FAMOUS ELIM-O-STATS

FOR RADIO NOISES

EXACT DUPLICATE ELECTROLYTICS

SOLAR *Elim-O-Stat*

RADIO NOISE SUPPRESSORS

FOR USE DIRECTLY AT THE RECEIVER

Type RA—Designed for use with radios which are receiving a small amount of hum through the power lines. Attaches easily on line plug. Can also be used on small appliances. An easily sold item. Max. current, 5 amps. Net price.....\$0.24

Type RB—Designed for same usage as Type RA, but is a heavier duty type. Plugs into power line. Max. current 5 Amps. Net price\$0.45

Type RN—Designed to prevent all types of radio noises from passing into the radio from power line. Effective on wave lengths from 15 to 2,000 meters, due to sectional band-suppression construction. Easily connected to radio through line plug and convenience outlet supplied with unit. Max. current 3 Amps. Net price.....\$3.00

FOR USE WITH DISTURBING ELECTRICAL DEVICES

Type AD—Designed for use on small appliances and really reduces radio noises over a wide frequency range. Plugs into power line and requires a short return wire to frame of appliance. Max. current 5 amps. Net price\$0.75

Type AF—Designed for heavier duty work. This is a capacitive-inductive type and should not be confused with cheap filters. Max. current 5 amps.

Net price.....\$2.40

Type AG—A real heavy duty capacitive-inductive type of noise filter. Effective on all waves from 15 to 2,000 meters due to sectional band-suppression circuit. Same construction as Type AF. Net price.....\$3.00

Type AH—A real heavy duty capacitive-inductive type of filter. When used with a multiple plug, the AH will filter out several appliances at once. Same construction as Type AF. Max. current 6 Amps. Net price.....\$3.90

TYPE AL—Especially designed to be used on all types of oil burners. Constructed in a metal cut-out box with facilities for connecting BX. Guaranteed to clear up noises due to oil burners. Net price.....\$4.50

Type DJ—Dial Telephone Elim-O-Stat. Can be installed in few minutes without disturbing telephone installation. Net price\$0.75

It is impossible in this limited space to list all the Elim-O-Stats for suppressing noise so we urge you to write us for the size and type you need. Special filters can be made up for various applications.

FAMOUS "LITTLE GIANTS"

MOULDED "DOMINO" CONDENSERS

PRECISION CAPACITOR ANALYZER

INTRODUCES
"DOMINO"

THE EYES HAVE IT!

BAKELITE MOULDED PAPER CONDENSERS

These new domino shaped condensers are moulded into treated bakelite, sealed against moisture and having permanent qualities not found in ordinary tubulars.

Your eyes
and the
MAGIC
TUBE
see all,
know
all.

QUICK AS A WINK!

SOLAR Precision CAPACITOR ANALYZER

HERE IS WHY YOU WILL LIKE IT

- 1 Measures Capacity—of electrolytic, paper, mica, and air condensers. Range .00001 to 70.0 mfd.
- 2 Measures Power Factor—of any electrolytic condensers, directly on a scale, in percentage.
- 3 Measures Resistance—directly in ohms, of resistors of all types. Range 50 to 2,000,000 ohms.
- 4 Measures Insulation Resistance—of condensers and insulation. Tests are made at voltages up to 450 volts D.C., provided by built-in power supply.
- 5 Detects Defective Condensers—directly indicates leaky, shorted, wrong capacity units, and "intermittents."
- 6 Is a Useful Continuity Meter—for any circuits.
- 7 Color-Coded Scales mean fool-proof operation. 45 linear inches of scales mean accuracy.
- 8 Direct Reading of all measurements eliminates extra charts and annoyance.
9. Cathode Ray Tube Balancing—the magic 6E5 tube gives sensitive visual balance—"quick as a wink."
- 10 Self-Contained—Compact—Portable.

TYPE CB160.
110 volts, 60 cycle.

SECURITY CONDENSERS

ROCK BOTTOM PRICES—ON QUALITY CONDENSERS

We guarantee all Security Condensers to be brand new, fresh, first quality condensers. Produced by one of the largest and best known condenser manufacturers. Do not compare Security Condensers with cheap, job lot "close-outs." You are getting real honest high grade quality condensers—fully guaranteed under the Standard R. M. A. guarantee.

EXTENSION SHAFTS

Type A—Length 4 in.

RS-242— $\frac{1}{4}$ in. diam., $\frac{1}{32}$ in. flat.RS-243— $\frac{1}{4}$ in. diam., $\frac{3}{32}$ in. flat.RS-244— $\frac{3}{16}$ in. diam., $\frac{1}{64}$ in. flat.

Any size. Price, each.....\$0.18

SPECIAL EXTENSION SHAFTS

Type B—2 in. long, $\frac{1}{4}$ in. diameter with $\frac{3}{32}$ in. slot. Enclosed in tight-fitting tube (D).

RS-245—Price.....\$0.21

Type C—2 in. long, $\frac{1}{4}$ in. wide, $\frac{3}{32}$ in. thick. Tongue shaped and fitted with tube (D). For use in auto receivers.

RS-246—Price.....\$0.21

VOLUME CONTROL WRENCH

Repairs damaged threads. Tightens nuts in close quarters. Fits control bushings and nuts.

No. 178—Price.....\$0.12
Or sent free with an order for six Yaxley Controls.

1. "The Roller That Does Not Roll."
2. Pure silver shortouts!
3. Silver to silver contacts!
4. Perfect smooth taper!

New ELECTRAD CARBON VOLUME CONTROL

Carbon resistance element permanently fused to the flat outer rim of a strong Bakelite ring.

Long aluminum shaft easily sawed or filed to desired length. Saves time and labor.

Mechanism provides 300-degrees of continuous rotation in a straight path.

Long bronze tension spring. Special-alloy floating contact travels end-wise without chattering.

Standard metal cover held by one screw. Instantly interchangeable with power switch assembly.

Molded Bakelite case protects mechanism and resistance element from dust and moisture.

Body of control extends only 1 1/2" back-panel, when mounted. Case only 1 7/16" wide.

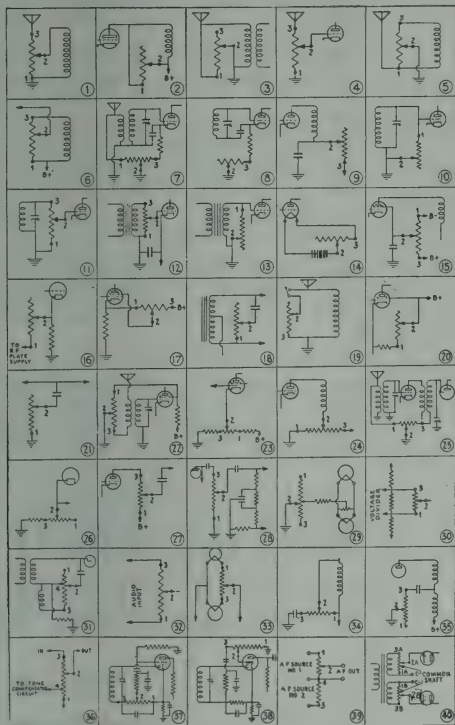

New-type power switch assembly (approved by underwriters) interchangeable with standard cover.

6 1/4 x 9 1/4
Volume
Control Guide
Free

Contains a complete list in alphabetical order of receiver models for which Electrad standard or special Replacement Volume Controls are made. The name of the manufacturer and the model number of the set are given with the proper Electrad Replacement Control. Resistance values and list prices are also stated. Ordering the control specified by this reference guide assures the use of the proper replacement unit in every case. Tear off flap of new Electrad Volume Control carton and mail to Electrad, Inc., 175 Varick St., New York City, and the manual will be sent to you by return mail.

Centralab Replacement Volume Controls

CENTRAL RADIO LABORATORIES

SELECTING THE PROPER VOLUME CONTROL

Curve form or taper of a variable resistance is more important to satisfactory control than its maximum resistance. Every Centralab control is made to a particular curve that is numbered and charted above. This chart indicates the per cent resistance change with rotation.

The ten heavy vertical lines represent every 10% the knob is rotated, the **LEFT TERM.** indicating the minimum volume end of rotation. The horizontal lines proportion the resistance change and divide equally whatever maximum resistance may be established for the curve.

Curves 1, 2 and 4 are illustrated as measured from the right terminal because they commonly carry a substantial amount of current from that end. Curves 3 and 6 are measured from the left terminal because they are principally used in shunt circuits where the taper from the left end is most important.

CENTRALAB MIDGET RADIOHM

\$0.60
Less Switch

\$0.90
With Switch

Small diameter controls for auto radio or midget set replacements. Case diameter 1-3/64 in. Depth—less switch 25/64, with switch 23/32 in. Soft aluminum shaft 2 1/4 in. long milled 1/32 in. full length. Easily cut to length required. Due to type of construction, separate switches are not available.

Catalogue No.	Less Switch	With Switch	Usual Circuit Location	Resistance Ohms	Curve

ELECTRAD

VARIOHM

VITREOUS ENAMELED ADJUSTABLE LUG RESISTORS

Monel metal end lugs are used to insure against weak connections with the resistance wire. The adjustable lug has been designed to provide long life without undue wear of the resistance wire. The ratings of Electrad Vitreous Resistors are based on a load in watts that will produce not more than 250° C. (450° F.) rise at the hottest point on a two-terminal resistor suspended in one foot free air. All tolerances \pm 5%. ALSO AVAILABLE IN 200 WATTS.

ELECTRAD PRECISION RESISTORS

Page 84

NEW! TYPE BN ATTENUATOR

See page 27

ELECTRAD POWER RHEOSTATS

Vitreous enameled rheostats applicable as speed controls for small motors, temperature controls and general voltage and current regulators. Ruggedly designed and constructed for long life at rated current loads. The contact shoe, of special metal graphite composition, contacts the wire-wound element on the outside surface. This insures smooth, noiseless action and long life.

Series II Sound Controls

New controls of the finest type for input circuits in broadcast stations, public address systems, and recording apparatus of new or old design. Will prove faultless in the most critical service.

Centralab Series II Controls have all resistors of the non-inductive carbon type specially tapered for constant impedance. Attenuation is continuously variable and practically straight line for 45 decibels at all frequencies up to 16,000 cycles. Long life is insured by the patented Centralab non-rubbing contact. This contact NEVER REQUIRES CLEANING. Centralab controls remain noiseless and accurate through years of service.

Electrostatic and electromagnetic shielding provided by a black finished steel case. Bakelite screw type terminal strip on back of case. All resistance elements insulated from shaft and bushing. Single hole mounting. Mounting bushing

$\frac{3}{8}$ inch long with two locknuts and lockwashers. Case diameter $2\frac{1}{2}$ inches. Depth back of panel "T" Pad, $2\frac{1}{2}$ inches; Gain Control, $1\frac{1}{2}$ inches. Maximum load dissipation, 1 watt. For detailed information, write for technical booklet.

3-inch black dial calibrated in silver and large pointer knob furnished with control.

K113—Dial.	Series II "T" pad fader, straight fader56
K114—Knob.	All Series II controls.....	.56

These dials are attractive in appearance and calibrated to match C.R.L. controls in rotation.

Head Phone Modu Plug

Price \$1.50

An attractive small bakelite case and knob housing a variable resistance and clips for attaching head phones. Potentiometer connection to control volume while maintaining constant resistance in the line. Especially adapted to deaf installations in schools, churches, etc., or in hospitals where multiple head sets are used.

Cord type is similar, but a 30-inch long phone cord replaces the stem.

Cord type 302-029.....	5,000 ohms
Cord type 302-028.....	10,000 ohms
Cord type 302-030.....	20,000 ohms

FREE—Centralab Manual—FREE Series II Sound Projection Controls

If interested in these controls, ask for this 15-page booklet with your next order to Lew Bonn Co. It gives complete information on the New Series II Sound Projection Controls, showing construction, application and many hints of value to you. Complete details.

CARBON RESISTORS

We guarantee these resistors to be the finest made, in every respect. They are much more accurate and will carry two to three times heavier load than ordinary carbon resistors. Every resistor has its resistance value plainly marked on it in addition to carrying the regular R. M. A. Color Code.

CRL—1½ Watt Resistor, ¼x1¾ in. Each.....\$0.12
We carry every size you may want from 50 ohms to 20 megs (we stock 112 different values). Order by writing CRL and then the resistance value you desire—per example CRL 50,000 will mean one of these resistors in 50,000 ohms.

Service Resistor Assortments—10 Assorted Resistors—1 each: 500,000, 200,000, 100,000, 50,000, 25,000, 10,000, 5,000, 2,000, 1,000, 500.....\$1.20

20 Assorted Resistors—Has above values and 1 each 2 meg, 1 meg, 750,000, 150,000, 40,000, 25,000, 20,000, 15,000, 8,000 and 300.....\$2.40

REPLACEMENT LINE BALLASTS

Replace Duresite Tubes, Amperites and other types of line ballasts—last much longer.

"BROWN DEVIL" VITRE- OUS RESIST- ORS

Brown Devil resistors are made in both 10-watt and 20-watt sizes. They have a real vitreous enamel coating instead of the high temperature cement used on the Red Devils. Brown Devil resistors should be used where there is excessive moisture; they should not be used at more than their rated wattages.

OHMITE ALL-PORCE- LAIN RHEOSTAT- POTENTIOMETERS

Ohmite rheostats are made entirely of porcelain and metal; their construction is the only real improvement in rheostat design in the last 25 years. Made in 25, 50, 100, 150, 300 and 500 watts, and in a large range of resistance values, these units are ideal for all amateur and broadcast station work. The exclusive features of these units include insulated shafts and bushings, all-porcelain construction, flat contact surface, large number of contact steps, carbon-graphite contact shoes.

CROWE MICROMASTER DIAL

Finest receiver dial made. Has adjustable planetary drive which may be loosened or tightened to provide exactly the proper condenser drag. Auxiliary pointer and positive gear drive affords exact repeat indication of wave length. Stations closely crowded may be accurately logged. Two-speed drive, slow speed 45 to 1, fast speed 9 to 1 in 360 degrees. Bronze escutcheon with "Croglas" non-inflammable convex crystal eliminates breakage. I. D. of escutcheon 3 1/2 in. Translucent pyralin scale with universal 4 channels graduated in kilocycles and megacycles. Pointers and knobs move in same direction. For 1/2-inch condenser shaft. Furnished complete

with double knob and dual pilot light bracket.
No. 301L—Condenser closes left.
No. 301R—Condenser closes right. Each..... **\$3.10**

CROWE AIRPLANE DIAL

I. D. of escutcheon 3 3/4 inches. Wedge drive with geared connection to the pointer. Ratio 7 to 1 in 180°. Pointer travels 268°. Bronze escutcheon. Ivory translucent dial, one pilot bracket included. An all-wave dial—4 channels.
No. 159L—Condenser closes left.
No. 159R—Cond. closes right. **\$1.90**

CROWE AIRPLANE DIAL

2 1/2 inches across face inside escutcheon. Friction disc drive. Ratio 7 1/2 to 1 in 180°. Includes pilot lite sockets. Bronze escutcheon. Black translucent dial. Convex glass. Two channels. An attractive dial.
No. 166L—Condenser closes left.
No. 166R—Condenser closes right. Each..... **\$1.50**

CROWE AIRPLANE DIAL

Friction disc drive. Ratio 9 to 1 in 180°. I. D. of escutcheon 2 1/2 in. Bronze escutcheon. Ivory translucent dial with four channel markings. Convex "Croglas" dial. Includes pilot lite sockets.
No. 183L—Condenser closes left.
No. 183R—Condenser closes right. Each..... **\$1.20**

AIRPLANE DIAL

2 1/2-inch black with white graduations Pyralin dial. Bronze escutcheon. Convex glass. Ratio 1 1/4 to 1, 180°. Friction drive.
No. 125—Right or left close..... **\$1.20**

MICROMASTER DIAL

Similar in construction to No. 301 dial, described above. Bronze escutcheon; 3 1/2 in. inside diameter, pilot lite brackets included.

No. 316R—Condenser closes right.
No. 316L—Condenser closes left.
Each **\$3.25**

LINE CORD RESISTORS FOR AC—DC RADIO SETS.

OHMITE

Replacement for Voltage Resistor Cords in AC-DC sets. Cord has built-in resistor as third wire for reducing line voltage to the correct value for the tube filaments.

STOCK VALUES

Stock No.	Total Voltage Drop in Filaments	Resistance of Cordohm
LC-1	18.0 to 24.0	330 ohms

BIRNBACH MAGNET WIRE

\$0.25 Per Spool

Plain enameled, double cotton covered and double silk covered magnet wire put up in proportionate lengths in even sizes from No. 14 to No. 40.

SHORT WAVE — ALL WAVE AERIAL SYSTEMS

"NO RADIO IS BETTER THAN ITS AERIAL"

RCA SPIDER-WEB ANTENNA

\$5.37

Stock No. 9685

RCA RK-40 DOUBLET ANTENNA

\$3.30

Stock No. 9631

The RCA Spider-Web Antenna System gives excellent signal pickup over the frequency range from 140 to 23,000 kc. By adding the Stock No. 9689 High Frequency Kit, Net Price \$0.90, the range is increased to 70,000 kc. with full noise reduction. All parts as shown in the illustration are contained in the kit which is assembled completely and can be installed in a very few minutes after supports are up.

The new RCA RK-40 Antenna system designed to reduce the time and labor required for antenna installation in the most difficult of locations. Merely attach each end to supports and make connections to the receiver. The time and money saved means more business and more profits for you. All parts as illustrated are included in the kit which is factory assembled and ready to install. All joints soldered.

FAMOUS "NOISE-MASTER" DE LUXE

This kit is recommended where "man-made" noises interfere with both the shortwave and broadcast bands. Licensed under Amy, Aceves & King patent No. 19,854 (re-issue). A highly engineered product which makes one aerial act electrically as two perfect antennas, by automatically selecting the varying frequencies of shortwave and broadcast signals. Two or more sets can be operated at the same time by using a transformer unit on each set. This kit assures the highest efficiency in eliminating "man-made" static over the entire radio receiving band.

Parts List

2-30 ft. coils 7/24 stranded copper antenna wire
1 upper transformer assembly
2 glass insulators
75 ft. twisted pair down lead
3-6 in. screw eye insulators
1 No. 755 dual lead-in strip
1 lower transformer unit
1-4 in. porcelain tube
1 instruction sheet
All parts assembled and ready to install.
Model 14
Net price **\$4.05**

POPULAR MODEL 13 "NOISE-MASTER"

For the first time at this popular price—a licensed Amy, Aceves & King antenna! Recommended for locations where "man-made" static interferes with short wave but not with ordinary broadcast reception. Due to the SELF-SELECTING characteristics of the transformer used in this installation, "NOISE-MASTER" is fully AUTOMATIC electrically... giving perfect reception on any wave length without adjustment or manual operation.

Contents

2-30 ft. coils 7/24 "TRI-COR" aerial wire
2 No. 2 glass insulators
1 triangular porcelain center insulator
50 ft. stranded down lead
10 ft. coil twisted lead-in for inside use
3-6 in. screw eye insulators
1 No. 755 dual lead-in strip
1-4 in. porcelain tube
1 No. 129 Self-Selecting transformer
1 instruction sheet

Model 13
Net price **\$2.04**

GENUINE "NOISE-MASTER"

Model 19

This antenna is a de luxe doublet, employing a No. 129 Amy, Aceves & King licensed SELF-SELECTING matching transformer and a junction-box in the antenna line. Easy to set up, and is fabricated at our factory, obviating the soldering of joints at time of installation. When properly erected, it assures excellent all-wave reception.

It is fully AUTOMATIC electrically, requiring no adjustment or manual operation after it has been correctly set up.

Contents

2-30 ft. coils 7/24 aerial wire
2 No. 2 glass insulators
1 junction-box assembly
75 ft. No. 123 twisted pair down lead
3 6 in. screw eye insulators
1 No. 755 dual lead-in strip
1-4 in. porcelain tube
1 No. 129 Self-Selecting transformer
1 instruction sheet

Model 19
Net price **\$2.58**

ALL WAVE AERIAL SYSTEMS

"No Radio is Better than its Aerial"

LYNCH ANTENNA SYSTEMS

The Arthur Lynch Co. has been a real leader in the presentation of short-wave and all-wave aerial systems. You will find listed below all of the latest Lynch antennas. (All Arthur Lynch antenna devices are licensed under A. K. K. patents.)

LYNCH Assembled HI-FI ALL-WAVE ANTENNA SYSTEMS

Noise reducing on all waves; efficient on all waves. Completely factory wired—just string up between masts. These are the new 1936 models and results will amaze you.

"JUNIOR" SYSTEM

Consists of:
1 HI-FI Coupling System with 50-ft. Twisted Pair Transmission-Line.
41-ft. Doublet 7/22 Copper Wire.
2 Commercial Type Insulators.
1—3-inch Emily Screw Eye.
2 Nailit Knobs.
1—4-inch Porcelain lead-in tube.
No. 1150—With 50-foot twisted pair lead-in.....\$4.05
No. 1151—With 100-foot twisted pair lead-in.....4.95

"STANDARD" SYSTEM

Consists of:
1 HI-FI Coupling System with 50-ft. Giant Killer Cable.
41-ft. Doublet, made of Heavy Hi-Mho Wire.
2 Navy Type Insulators.
1—3-in. Emily Screw Eye.
2 Nailit Knobs.
1—4-inch Porcelain lead-in tube.
No. 1003—With 50-foot Giant Killer Cable.....\$5.10
No. 1004—With 100-foot Giant Killer Cable.....6.90

MASTS ANCHORS

PREMAX Telescoping Tubular STEEL MASTS

All-wave sets demand antennas. These masts meet every demand for a strong, inexpensive, weatherproof and good-appearing aerial support. Premax masts are made up of tubular steel sections—telescoping within each other. Can be firmly locked at any adjustment. Sections are uniform and interchangeable permitting any mast to be made into a longer length by the addition of another base section. For lengths above 13 feet one or more tubular steel extensions (X-3) may be added to the base of the M-156 mast. Come complete with necessary fittings.
No. M-42—Single sec. mast. Length 3½ ft. Weight, 2 lbs.....\$0.60
No. M-84—Two sec. mast—7 ft.—5 lbs.....1.05
No. M-120—Three sec. mast—10 ft.—7 lbs.....1.65
No. M-156—Four sec. mast—13 ft.—10 lbs.....2.25
No. X-3—Sectional extension—3 ft.—2½ lbs......60
Extra base flanges with bolt—per pair......09
Individual sections—B-C-D. Each......60

PREMAX

PREMAX MASTS

Illustrated on right. Made of solid ¾ in. rod—rust-proof finish. Adjustable base. Large double-grooved insulator. 3½ ft. high.
No. R148—Less brackets \$0.33

INSULATOR BRACKET

Formed steel arm—8 ins. long—with white porcelain insulator that can be used in 3 positions.
No. IB-8.....\$0.18

CALVANIZED GUY WIRE

50 ft. steel wire—non-stretching.
No. G-50—Per coil.....\$0.15

ANTENNA TENSION INSULATOR

An insulator and a heavy spring. Attaches to any style mast.
No. TI-1—Each \$0.06

AERIAL SPRING ADJUSTER

Eliminates sag in antennas. As shown.
No. BAS-60.....\$0.30

DEDUCT 2% FOR CASH WITH ORDER

LYNCH "GIANT KILLER" KIT

A very popular kit—low priced. Includes all of the basic material for the latest type antenna system and the additional units may be added at any time. Standard kit includes: 35 ft. giant killer cable, 50 ft. Hi-Mho (heavy grade) ant. wire, 3 Lynch commercial type insulators, 1 stand-off, 2 Nailits, 1 porcelain tube and complete instructions.

No. 1040—As listed.....\$2.10
No. 1041—Same but 50-foot Giant Killer Cable.....2.65

LYNCH BOOSTER COUPLER

As the name implies the Lynch Booster Coupler will increase the signal when used with any doublet system in which an antenna transformer is not used. Especially recommended for use with the Giant Killer All-Wave antenna system.

No. 1706.....\$0.90

LYNCH GIANT KILLER CABLE

New improved transmission cable with two conductors covered with latex rubber. Will stand 20,000 volts. Excellent for transmitters up to 600 watts.

No. 1060—50-foot coil.....\$3.00
No. 1061—100-foot coil.....6.00

ALL WAVE RECEIVER COUPLER (Variable)

Makes it possible to match the doublet antenna to all broadcast and short wave receivers. A switch converts doublet to a conventional "T" antenna on broadcast frequencies.

No. 8919—Net, each.....\$1.29

WHEEL STATIC ELIMINATORS

Take out noise from brakes, etc.

Net price (pair).....\$0.18

GUY WIRE TENSION SPRINGS

PREMAX PARAPET MAST SUPPORT

Just the thing for those tough apartment house installations. No holes to drill—no nails to drive. Fits any parapet or fire wall up to 20 ins. Holds round masts from ¾ ins. to 2 ins. or square up to 2x2 ins. Weight, 8 lbs.
No. PS-18..\$1.50

PREMAX TRUSS BRACE

An arrangement that permits locating masts at extreme end of roof. Fits round masts from ¾ to 2 ins.—square up to 2x2 ins. Length 24 ins. Weight, 2 lbs.
No. TB-24—Each \$0.45

YAXLEY SINGLE SECTION SWITCHES

Giving combinations from single pole, single throw to six pole, double throw.

No. Y2742—Single Section Switch, 1½-inch diameter, gives the following combinations:

Single pole, single throw.	Three pole, single throw.
Single pole, double throw.	Three pole, double throw.
Two pole, single throw.	Four pole, single throw.
Two pole, double throw.	Four pole, double throw.

Net price, each\$0.45

No. Y2762—Single Section Switch, 2-inch diameter, provides all of the combinations available in the 2740 type Switch and also provides for:

Five pole, single throw.	Six pole, single throw.
Five pole, double throw.	Six pole, double throw.

Net price, each\$0.60

Instructions in each box.

YAXLEY CIRCUIT OPENING SWITCH

This new switch will "open" any one of the twelve "lines" for the insertion of a current reading meter such as a milliammeter and maintain a "through" circuit on the other eleven lines. Used in tube checkers, analyzers, etc. 1½ ins. long x 2½ ins. wide; ¾-in. bushing and ¼x¾-in. shaft.
No. Y1400—Complete with knob and dial and instructions. \$2.70

SPECIAL 15-POINT TAP SWITCH

Shorting type—single gang only, includes dial plate.

No. Y150\$0.90

PHOTOELECTRIC PARTS — EQUIPMENT

PE Cell
\$3.25
each

EBY ELECTRIC EYE

Relay
\$4.25
each

This radically new and different photo-electric cell has a ruggedness and response heretofore unattainable in a cell of twice the price. It is an electronic device consisting of two metal electrodes between which the light sensitive material is exposed to incident light rays. It is not affected by continued exposure and may be operated on voltages as high as 250. Responds to frequencies as high as 9000 C.P.S. and is sensitive through the entire visible spectrum. The relay is a sensitive high speed type, suitable for use in vacuum tube plate circuits and operates on 11.25 milliwatts. Standard coil resistance 5000 ohms. Contacts handle 2.5 amps. at 115 volts—SPDT armature permits use in either closed or open circuits.

EBY EXPERIMENTAL KIT

Consists of photo cell, relay, sockets, potentiometer resistor, condenser, terminal strip, and the electric eye handbook described below. Many interesting and practical experiments possible. Your net cost, **\$10.00**

TYPE G POWER RELAY

For operation with either A.C. or D.C. on the coil and for use in conjunction with the Type E Relay described below or may be used with the Eby Relay described above where it may be desired to control circuits of greater

load. Coil consumption less than two watts. Contacts SPDT, 10 amperes at 115 volts A.C. or 3 amperes at 115 volts D.C. May be used to control motors, lights, signals, etc. Net price, each, **\$3.25**

ELECTRIC EYE BOOKLET

This 32-page booklet, "The Electric Eye in Theory and Practice," written by Eby engineers contains complete details on all electric eye types and much helpful information on this important industrial development. Fully illustrated with 30 diagrams. List price, 50c; net, **\$0.35**

LIGHT SOURCES

No. 1227A—Light source for photo-electric applications requiring a light beam projected up to 25 feet. A 6 volt lamp is mounted in a steel case 4 inches high. Net price, **\$6.75**

No. 1227R—Light source. Similar to 1227A but for applications requiring image focus as close as 3 inches to lens. Net, each, **\$10.00**

CELL HOUSINGS

No. 1226 — Has a 1½-inch diameter aperture tube 3 inches long. Has socket for Visitron Type A Cell. Net price, **\$5.50**

REFLECTING MIRROR

No. 2510—Mirror. Designed for use in changing direction of beam or deflecting it around corners. Useful in hiding light source from view. Each, **\$7.50**

TYPE E ELECTRO-MAGNETIC RELAY

For operation on D.C. and full or half-wave rectified current.

These relays are an improved form of sensitive electromagnetic relay which are especially suitable for use in D.C. control circuits involving either "on-off" or marginal operation. They are particularly useful in electronic devices in conjunction with thermionic or gas filled discharge tubes. High speed of operation, ruggedness of construction, accuracy of alignment, large current capacity of the contacts and ease of adjustment are but a few of their features.

Operating characteristics of Standard D. C. Relays on Continuous Current:

Cat No.	Res. of Coil-Ohms	Volts Pick-Up	Amps. Pick-Up	Net Price

E10XAB	100	4	.040	2.40

No. 71A.

Visitron Cell Type 71A. Net.... **\$6.00**

Visitron Cell Type 79A. Net.... **6.00**

No. 79A.

PHOTOELECTRIC CELLS

Visitron Type A Cells are gas filled. They carry a full guarantee of one year and under normal operation their life greatly exceeds the guarantee period. Visitron quality can be evaluated in terms of high sensitivity, long life, high glow voltage, stability and high frequency response. The inserted metal plate construction is a decided improvement over older types of cells in which the sensitive surface was deposited on the inner wall of the glass envelope.

ELECTRONIC RELAY CONTROL UNIT

GAIN PHOTO-ELECTRIC EXPERIENCE

This relay control unit makes use of the Visitron 71A cell and the E63 CAB relay in an A.C.-D.C. circuit as shown below. The relay has two separate sets of switch contacts so that the unit can be made to either start or stop the device to be controlled. We do not furnish it wired or assembled but will supply any or all parts as per the prices listed. Every business concern is a prospect for one of these units and live wire servicemen are going to cash in on this business while it is new.

RADIO MEN EVERYWHERE

Are commencing to learn the fundamental principles of photo-electric applications to industry. The prospects of business in this field are staggering and we are sure have gone unnoticed by the radio service profession. We hope that, by taking the lead in this branch of radio, we are going to point the way toward future profits for you. The uses of photo-electric equipment are too numerous to mention more than a few: counting, sorting, lighting control, alarm service, safety devices, door openers, announcers, etc. More specific applications might be: determining foul line in bowling alleys, sorting colors, lighting signs when headlights approach, signaling the entrance of a customer to office or store, or turn on street lights when sun sets, and many others.

R F COILS—TRIMMERS—CHOKES

ALL WAVE COIL ASSEMBLY

Consists of antenna, R.F., and oscillator coils for all bands, 15 to 550 meters, when used in conjunction with the DeJong 3-gang 370 mmf. condenser shown below. Includes wave change switch and all padding and trimming condensers.

No. 5780—Net price, each...\$8.10

DEJONG BAND-SPREAD CONDENSERS WITH AIRPLANE DIAL

A new band-spread tuning unit providing electrical bandspread by a single dial and knob. Main tuning condenser drives one pointer; auxiliary bandspreading condenser drives other pointer. 4-inch Airplane Dial has dual scale, 0-100 and 0-10. Ingenious single knob drives both tuning and band-spread condensers.

MILLER PRESELECTOR COIL KIT

Covers 12 to 200 Meters

A high gain, 2 stage TRF amplifier for use ahead of any S.W. receiver. Self contained power supply. High gain coils. Absolute image suppression. Operates on either single wire or doublet antenna. Band-change switch. Tubes used: two 68 (or 6D6) and one 80. Full instructions and diagrams furnished.

No. M302—Kit of coils, chokes, trimmers and band-change switch.	\$4.80
No. M302DC—Drilled chassis for M302	1.35
No. M302C—Metal cabinet for M302	3.90
No. M150—Airplane dial for M302 (2-gang .00035 Mfd. condenser used.)	1.95

MILLER SHORT WAVE CONVERTER COIL KIT

A truly efficient short wave unit—built-in power supply. Can be used with supers or TRF sets. Tubes used: one 2A7, one 68 and one 80. Three bands covering 12 to 200 meters. Full instructions and diagrams furnished with each kit. Kit contains all necessary coils, band-change switch, trimmers, padders and chokes.

No. M301	\$6.00
No. M301DC—Drilled chassis for M301	1.35
No. M302C—Metal cabinet drilled for M301	3.90

GUTHMAN RECEIVER COIL KITS

6 TUBE SUPERHET. SHORT-WAVE AND BROADCAST COIL KIT

530-1500 Kc:
18-2.5 Mc 200-
550 and 17-120
Meters—3 Gang
Condenser

A new superhet. coil kit for the set-builder who is interested in foreign short-waves as well as domestic broadcast. Easily built, this set is the equal in performance of any commercial set of its type. Advanced circuit

employs latest tubes: 6A7, 6D6, 76, 6C6, 42, and 80 or equivalent ALL-METAL tubes. Kit of six coils (all illustrated) includes an Antenna, R. F., two Oscillator coils, and two double-tuned I. F. transformers. Litz-wound, accurately peaked at 456 Kc., and mounted in square shield cans 1 1/2 ins. square by 3 ins. high. All leads color-coded. Circuit diagram included with each kit.

Complete Kit of 5 Matched Coils, including circuit diagram, less variable condenser. Shipping weight, 3 lbs.

Kit 401.....\$4.95

7 TUBE SUPERHET. BROADCAST COIL KIT

175 to 550 Meters
Police Calls, Etc.

Anyone with a fair knowledge of radio circuits can assemble this receiver with the aid of the circuit diagram included with each kit. Actual laboratory tests on receivers built from these units have proven them to have 10 Kc. selectivity over the entire tuning range, with a sensitivity of better than 1

microvolt. The kit of five perfectly matched coils includes an Antenna coil and an R. F. coil, both bank-wound Litz secondary, high impedance primary; bank-wound Litz oscillator coil, and two double-tuned Litz-wound I. F. transformers. All coils mounted in low-loss shield cans, as illustrated. This circuit employs seven of the latest type tubes: 2-58's, a 2A7, 55, 2-2A5's, and an 80 or equivalent ALL-METAL tubes. I. F. transformers are accurately peaked at 175 Kc. A .000365 mfd. 3-gang variable condenser is used with this kit.

Complete Kit of 5 Matched Coils, including circuit diagram, less variable condenser. Shipping weight, 2 lbs.

Kit 310.....\$3.95

5 TUBE SUPER COIL KIT 15-50 and 200-550 Meters

A. C. or A. C.-D. C. Amazing results can be obtained by using this coil kit as a foundation for a very sensitive Broadcast and Short-wave receiver. Tubes used are as follows: for A. C.-D. C. 6A7, 78, 77, 43 and 12Z3; while for A. C. only 2A7, 58, 2B7,

2A5, and 80. Equivalent ALL-METAL tubes can be used in place of aforementioned glass tubes. Four coils in this kit include: specially designed center-tapped R. F. and Oscillator coils which are wound on bakelite tubing, having space-wound secondaries on short-wave sections and lateral Litz winding on broadcast secondaries; two Litz-wound double-tuned shielded I. F. transformers, peaked at 456 Kc.; all as illustrated. Complete with circuit diagram.

Kit 305.....\$3.75

5 TUBE AUTO KIT

Superhet.
200-550
Meters

Using this kit as a foundation it is a simple matter to build a remarkably sensitive, highly selective 5-tube superhet auto radio. This advanced circuit employs 2 6D6's, a 6A7, a 75, and a 41 or equivalent ALL-METAL tubes. Five coils comprise the kit, as illustrated: Antenna, R. F. Oscillator, and two I. F. transformers. The first three coils mentioned are lateral space-wound for high efficiency, with Litz wire secondaries. The I. F. transformers are double-tuned and peaked at 175 Kc. All coils mounted in shield cans, as illustrated. Circuit uses Standard "B" Supply. A circuit diagram is furnished with each kit. Shipping weight, 4 lbs.

Kit 400.....\$3.25

5 TUBE SUPER HET. COIL KIT 200 to 550 Meters

2 Gang Condenser
A. C. Only

An accurately designed kit of four coils for constructing the most modern type of 5-tube A. C. Broadcast receiver. This circuit employs a 2A7 as R. F. Oscillator and Mixer, a 58 as I. F. amplifier, a 2B7 as diode detector and first A. F., a 2A5-output tube, and an 80 rectifier. Equivalent ALL-METAL tubes may be used. Kit includes four coils: Antenna, Oscillator, and two I. F. transformers. Last named are Litz-wound, shielded, double-tuned and peaked at 456 Kc. Square I. F. shield cans measure 1 1/2 ins. by 3 ins. high. All leads color-coded for easy identification. Shipping weight, 4 lbs.

Kit 308.....\$2.95

VARIABLE CONDENSERS

With Trimmers

For tuned radio frequency, 1/4 in. shaft, either right or left hand.
Two-gang, .000365 mf. Price\$1.00
Three-gang, .000365 mf. Price\$1.50

FOR SUPERHETERODYNES

1/4 in. shaft, right or left hand, oscillator section either end.
Two-gang, 456 kilocycles, tracking section. Price\$1.00
Three-gang, 456 or 175 kilocycles, tracking section. Price\$1.50
Four-gang, 175 kilocycles, tracking section. Price\$2.00

For all-wave sets, 1/4 in. shaft, clockwise only.

Two-gang, 410 mmf. each section. Price\$1.05
Three-gang, 410 mmf. each section. Price\$1.50

HAMMARLUND PADDING AND TRIMMING CONDENSERS

Equalizing condenser for neutralizing, balancing and trimming, 1 1/4 by 1/2 in.

GUTHMAN R. F. AND I. F. TRANSFORMERS

R.F. AND ANTENNA COILS

175 to 550 Meters

Matched real hi-gain coils for T.R.F. receivers. Litz bank-wound secondaries with either high or low impedance primaries, as desired. Supplied complete with mounting bracket, dowel and brass mounting screws. Coil diameter $\frac{7}{8} \times 2\frac{1}{4}$ in. long. For use with standard .00036 mfd. variable condenser. Coil connection diagram with each. Excellent for replacement for constructors.

Part No.	Type	Prim. Imp.	Your Cost
A1008	Ant.	Low	\$0.29
B1008	R.F.	Low	.29
A1001	Ant.	High	.34
B1001	R.F.	High	.34

SHIELDED LITZ R.F. & ANT. COILS

175 to 550 Meters

For T.R.F. or Superheterodyne receivers, when used with proper oscillator coil. Precisely matched. Completely shielded in can whose dimensions are 1 1/2 in. diameter, 2 1/4 in. high with 2 6/32 in. spade lugs. Available with high or low impedance primaries. When used with screen grid tubes high impedance primaries are desirable in order to secure proper gain. Windings are of solenoid type—which results in a coil of maximum inductance (for given amount of wire) and least R.F. resistance. Designed for use with .00035 mfd. variable condenser. Covers complete B.C. band—175 to 550 K.C. Each coil supplied complete with instructions and diagram.

Part No.	Type	Prim. Imp.	Your Cost
A1007	Ant.	Low	\$0.34
A1018	Ant.	High	.40
B1007	R.F.	Low	.34
B1018	R.F.	High	.40

MIDGET ANTENNA R.F. AND OSCILLATOR COILS

1 1/4 x 1 1/4 in. high.

A2098—Ant. Coil.
B2098—R.F. Coil.
O3098—Oscillator Coil.
Price\$0.45

Small size high gain shielded coils. Designed for Superheterodyne and T.R.F. receivers requiring compact efficient coils. Newest type Litz wire sectional winding with low R.F. resistance and distributed capacity. For use with .000365 (.00035) mfd. variable condensers. All coils may be used in any combination desired. Supplied complete with wiring diagram.

ANT. R.F. & OSC. COILS

15-55 and 200-550 Meters

Very popular style of coil. Covers two most desired ranges, domestic broadcast and foreign short-wave. Short-wave section is space-wound on threaded bakelite. Mounting bolts on dowel stick facilitate proper installation. For use with .000365 variable condenser (standard type). Supplied with diagram.

SHORT-WAVE SHUNTS

No. 2048—Price, each \$0.17
Enables receivers designed only for the regular 200 to 550 meter band to include 75 to 200 meter short-wave bands. Small size, $\frac{7}{8} \times \frac{1}{2}$ in. high. Diagram showing how to connect in the circuit included. One short-wave shunt is required for each antenna and each R.F. coil in set. Get police calls on car sets—used with a switch.

ANTENNA AND OSCILLATOR COILS FOR SUPERHETS

Lateral-wound oscillator and antenna coils for superhets. Coils can be used separately if desired, or can be used in pairs. These coils make ideal replacements for standard sets. Broadcast coils wound on a dowel, $\frac{1}{2} \times 1$ in. long. Broadcast-short-wave coils wound on a dowel, $5/16 \times 1\frac{1}{2}$ in. long. Instructions and diagram with each coil. Broadcast coils cover 1500 to 550 K.C., and combination short-wave and broadcast cover 1,500-550 K.C. and 4,000-1,500 K.C.

I.F. TRANSFORMERS

In Metal Shield with Tuning Condensers

For use as replacements or in new set design. Can be used in any combination required for I.F. stages. Tuning condensers are of the mica compression type, on Isolantite bases and are adjustable from the top of the shield can. Leads are color coded. Diagram furnished with each unit. The inductances are the lattice wound type mounted on wood forms specially impregnated and impervious to moisture. Coils in round and square shields have same electrical characteristics and are interchangeable.

SW & BCL HI-GAIN LITZ COILS

120 to 200 Meters

200 to 545 Meters
Completely shielded 2-band coils. Comprises hi-impedance primary with Litz wound secondary tapped for low wavelengths. For use with .00035 mfd. variable condenser. Can 1 1/2 in. diameter and 2 1/4 in. high, with spade bolts for mounting. Also diagram.
No. A1032—Antenna Coil. Price....\$0.47
No. B1032—R.F. Coil. Price..... .47

UNSHIELDED ANT. & R.F. COILS

75 to 550 Meters

High impedance primary of plain enamel wire. Has shunt winding adjacent to secondary to cover the short-wave band, recommended for maximum efficiency in comparison to the tapped coils. Tunes with usual .000365 mfd. variable condenser. Covers 75 to 200 and 200 to 550 meters. Wiring diagram furnished showing coil connections. Coil size is $\frac{7}{8} \times 2\frac{1}{4}$ in. long. Mounting bracket and dowel, brass mounting screw and bolt furnished.
No. A120—Antenna Coil. Price....\$0.38
No. B120—R.F. Coil. Price..... .38

COMPOSITE UNITS

High-gain composite coil used as combination I.F. and oscillator. Designed for the special tracking section on the variable condenser. Top tuning. This unit is furnished in 175 K.C. and 456 K.C. frequencies, mounted in a shield 1 1/2 in. in diameter by 3 1/4 in. in height. Equipped with two spade-mounting bolts.

Each
No. 3094—175 K.C.....\$1.30
No. 3183—456 K.C..... 1.30

HIGH-GAIN COMPACT BROADCAST AND POLICE BAND COIL

High impedance primary, triple section Litz wire secondary, for use with .000365 condenser. Covers a range of 75 to 200, and 200 to 540 meters. Band switching may be accomplished with a double pole single throw switch. Coils are $\frac{7}{8}$ in. diameter x $1\frac{1}{2}$ in. long. Impregnated form, with a single hole mounting bracket.
No. A1066—Antenna Coil. Price....\$0.30
No. B1066—Interstage R.F. Coil. Price30

PRIMARY REPLACEMENT WINDING

High impedance silk enamel windings for replacing burned out antenna primaries. Sliding collar permits variation of coupling in relation to secondary.

No. 6000—For 1 1/4 in. outside diameter of secondary coil. Price.....\$0.15
No. 6001—For 1 in. outside diameter of secondary coil. Price.....\$0.15
No. 6002—For 3/4 in. outside diameter of secondary coil. Price\$0.15
No. 6003—For 1/2 in. outside diameter of secondary coil. Price.....\$0.15

R. F. And I. F. Transformers

For Better Radio
Hammarlund
PRECISION
PRODUCTS

I. F. TRANSFORMERS Air-Tuned

Reduces "drift." Increased selectivity and sensitivity. Size, 5x2-3/32 inches.

ATT176—(175 K.C.) \$2.70
ATT465—(465 K.C.) 2.70
ATT525—(525 K.C.) 2.70
ATO465—(465 K.C. beat oscillator)... 2.70

The three I. F.'s listed can be had center-tapped. Just add "C.T." to catalogue number.

TYPE "T" I. F. TRANSFORMERS

All transformers are tuned grid, tuned plate type with lattice wound coils impregnated to prevent moisture effects. Litz windings are used in 465 K.C. short wave transformers. Tuning condensers are mica type mounted on Isolantite and adjustable from top of the shield can. Leads R.M.A. color coded and tagged. Secondaries are either plain for standard screen grid tubes or center-tapped for tubes requiring split input circuits such as Wunderlich tubes, 55's, 75's, 83's, 2A6's, etc.

Aluminum shield cans measure 2 1/4 in. O. D. by 3 1/4 in. high. Mounting is on 2-inch centers.

AIR-TUNED I.F. TRANSFORMERS

The adjustable coupling feature of the popular type "A" ALADDIN Polyiron core I.F. transformer is now available as type GA with dual air trimmer. This design is particularly suitable to the needs of the advanced amateur and designers of special equipment wherein the utmost freedom from frequency drift must be maintained over long periods of time.

Shield size 1-7/16 in. x 1 1/2 in. x 4 in.

Type	Use	Between	Net Price
GA101	Converter	6A7-6D6	\$3.90
GA101M	Converter	6A8-6K7	3.90

Net price any type.....\$3.30

INDUCTANCE TUNED I.F. TRANSFORMERS

In Type P, inductance adjustment replaces the usual condenser trimmers to produce an advanced design I.F. transformer. Fixed sealed condensers provide permanency of alignment. Both primary and secondary coils are tuned by adjustment of their Polyiron cores. Correct coupling is secured by mounting the Litz-wound coils on separate axes. Type P transformers may be used with either glass or metal tubes.

Shield size 1 7/16 in. x 1 1/2 in. x 4 in. high aluminum.

Available in the following types at \$2.10 each, net.

Type	Frequency	Use
P101	465 K.C.	Converter
P100	465 K.C.	Interstage
P200	465 K.C.	Diode

ANTENNA & R.F. COUPLERS

High gain coils using Polyiron cores. Higher gain and sharper resonant curve than is possible with air core coils. Inductive and capacitive coupling. All are Litz-wire wound. Fig. 1 illustrates unit in round

CARRON EXACT DUPLICATE REPLACEMENT COILS

These coils are exact duplicates of the original in physical and electrical characteristics. All coils are thoroughly impregnated to withstand any and all atmospheric conditions.

IMPORTANT! If the coil you want is not listed, send us the old coil and its mate, if any, model number and all pertinent information regarding same, and we will duplicate same.

Speaker Accessories

CARRON SPEAKER CENTERING SHIMS

For adjusting cone in pole piece. 16 shims assorted in 4 sizes—.005, .0075, .010 and .0125 in. In handy leather case. **\$0.35 Per Set.**

EVEREADY SERVICE CEMENT and SOLVENT

Cement—specially prepared for cementing new cones, for repairing rattling cones, loose tube bases, etc. Is quick-drying, waterproof.

Large 2-oz. bottle.....**\$0.30**

Solvent—for loosening old cement on radio parts and is a good cleaner. Can be used to thin the cement.

2 oz. bottle.....**\$0.15**

DIAL LITE COLORING

Modern radio receivers use colored dial lites, making it necessary for servicemen to have this kit. Five colors as shown in illustration. Instant drying.

No. EDL—Per kit.....**\$0.30**

COLOR CODING ENAMEL

Handy item for coding coil forms, jacks, terminal strips, etc. Four bottles of enamel—green, blue, red and yellow—and one bottle of thinner, together with four brushes.

No. A190.....**\$0.30**

PERMEABILITY COIL DOPE

To increase inductance of low coils or match up odd ones. Just smear it on and let it dry. May also be applied to inside of form.

2 oz. tube.....**\$0.25**

EVEREADY LIQUIDOPE

An ideal coil dope, specially prepared for holding windings to coil forms. Tightens the windings and gives an all-weather coat to windings as well as protection against scratches, etc. 2 oz. bottle.

No. ED2.....**\$0.30**

UTAH ORTHOVOX COILS

High Impedance, 7000 ohms
Med. Impedance, 4000 ohms
Low Impedance, 2000 ohms

Each **\$0.45**

CARRON

PATENT

PENDING

Inter COMMUNICATOR

This system consists of a compact amplifier of special design, housed in an attractive crystalline finished metal case, and two identical station units with the necessary cables for quick installation. Each station unit consists of a high grade P. M. speaker, encased in a fine hand rubbed walnut finish cabinet. The "Talk-Listen" switch is of the quick acting push button type, employing special alloy contacts in the springs.

EXCLUSIVE CARRON FEATURES

- 1—Only one electric outlet needed for the entire system.
- 2—Can be installed by anyone in five minutes. No splicing or screws to loosen.
- 3—Voice is reproduced as clear and distinct as a radio. No blasting speak at arm's length.
- 4—As many as four station units may be used with one amplifier in much the same way as a four party telephone line.
- 5—More economical in first cost, as well as upkeep, than any other system on the market.

WRIGHT-DECOSTER MULTI-TEST SPEAKER

\$30.00 List

- ★ Universal output transformer
- ★ Universal voice coil transformer.
- ★ Universal field coil transformer.
- ★ Matches all tubes.

- ★ Matches all output transformers.
- ★ Matches all set field combinations.

HOW TO GET ONE

Upon deposit of \$15.00 with us, we will ship you a Wright-DeCoster Multi-Test Speaker. We will accept 75 of these Wright-DeCoster coupons any time on or before the expiration date of this offer as a merchandise credit of \$7.50 against your deposit of \$15.00. Thus making this Wright-DeCoster Multi-Test Speaker

Cost You Only \$7.50

These valuable coupons are packed with all Wright-DeCoster products:

- 1 coupon with each Model 5 and 6-inch speaker.
- 2 coupons with each Model 8-inch speaker.
- 3 coupons with each Model 10-inch speaker.
- 5 coupons with each Model 12-inch speaker.
- 10 coupons with each stadium model speaker or horn.

This offer expires January 1, 1937.

CAMPBELL'S BLACK WRINKLENE LACQUER

This lacquer will give any metal part that professional appearance. You can easily crackle your own panels, chassis, etc. Complete directions furnished.

No. CL2— $\frac{1}{2}$ pint.....**\$0.69**
No. CP—Pint can.....**1.25**

HIGH VOLTAGE INSULATING CAMBRIC

Breakdown Voltage, 10,000 Volts

Used in building transformers, repairing field coils, etc. This is a dry yellow cambric that is dependable and safe. Handy for servicemen as well as amateurs. Over 210 square inches in the roll.

No. RS—Per roll.....**\$0.30**

A.C. - D.C. FIELD COILS

No. U300—1000 ohms.
No. U301—1500 ohms.
No. U302—2000 ohms.
No. U303—2500 ohms.
No. U304—3000 ohms.

Furnished with extra gaskets and additional cores.

Your price **90c**

LOUD SPEAKER GRILL CLOTH

Beautiful designs to harmonize with finish of cabinets. Furnished in squares 12 in. x 12 in.

2H-2U

4 TUBES—2.5 VOLTS

For 2-57, 58; 1-2A5; 1-80.
 Secondary—560 V.C.T. at 30 m.a. 2.5 V. at 3.5 amps. C.T. 5V. at 2 amps.
 Primary—V.A. 30. Dimensions—3x2½x2½ ins. high.
 Mounting holes—2-3/16 in. Weight—3 pounds.
 T-6049—Price\$1.20

5 TUBES—6.3 VOLTS

For 2-76; 2-42; 1-80.
 Secondary—610 V.C.T. at 125 m.a. 6.3 V. at 2 amps. C.T. 5 V. at 2 amps.
 Primary—V.A. 75. Dimensions—3½x3¼x3½ ins. high.
 Mounting holes—3½x2½ in. Weight—6 pounds.
 T-7547—Price\$2.25

4 or 5 TUBES—6.3 VOLTS

For 2 or 3-77, 78, 6K7, 6F5; 1-42, 6F6; 1-80, 5Z4.
 Secondary—600 V.C.T. at 50 m.a. 6.3 V. at 2 amps. C.T. 5 V. at 2 amps.
 Primary—V.A. 45. Dimensions—3½x2½x3 ins. high.
 Mounting Holes—2½ in. Weight—4 pounds.
 T-7020—Price\$1.65

5 TO 9 TUBES—2.5 VOLTS

For 4-24, 27, or 7-56, 57; 1-47, 2A5; 1-80.
 Secondary—700 V.C.T. at 70 m.a. 2.5 V. at 8.5 amps. C.T. 5 V. at 2 amps.
 Primary—V.A. 65. Dimensions—3½x3¼x3 ins. high.
 Mounting holes—3½x2½ in. Weight—5 pounds.
 T-4900—Price\$1.95

UPRIGHT SHIELDED MOUNTING—TYPE 2G

10 TUBES—1.5 VOLTS

For 5-26; 2-27; 2-71A; 1-80.
 Secondary—650 volts C.T. at 70 m.a. 1.5 volts at 1 amp. 1.5 volts at 4 amps. 2.5 volts at 3 amps. C.T. 5 volts at 5 amps. C.T. 5 volts at 2 amps.
 Primary—V.A. 60. Dimensions—3¼x3¼x4½ ins. high.
 Mounting holes—2½x3 in. Weight—7 pounds.
 T-5601—Price\$2.70

11 TO 13 TUBES—6.3 VOLTS

For 8 to 10-76, 6C6, 6D6, 6C5, 6K7, 6F7; 2-42, 6F6; 1-80, 5Z3, 5Z4.
 Secondary—745 volts C.T. at 145 m.a. 6.3 volts at 4.5 amps. C.T. 5 volts at 3 amps.
 Primary—V.A. 110. Dimensions—3¼x3¼x5 ins. high.
 Mounting holes—3¼x3¼ in. Weight—8 pounds.
 T-7062—Price\$3.30

10 TUBES—6.3 VOLTS

For 6-76, 6C6, 6J7, 6C5, etc., 2-42, 6F6, etc.; 1-82; 1-83, 5Z3, 5Z4.
 Secondary—880 volts C.T. at 125 m.a. (Bias tap for 38 volts). 6.3 volts C.T. at 200 m.a. 2.5 volts at 3 amps. 5 volts at 3 amps.
 Primary—V.A. 105. Dimensions—3¼x3¼x5 ins. high.
 Mounting holes—3x3¼ in. Weight—8 pounds.
 T-7428—Price\$3.90

9 to 14 TUBES—2.5 VOLTS

For 5 to 9-56, 57; 2 to 4-2A3; 1-83, 5Z3; 1-82.
 Secondary—700 volts C.T. at 200 m.a. 2.5 volts at 15 amps. C.T. 5 volts at 2 amps. 5 volts at 3 amps.
 Primary—V.A. 135. Dimensions—3¼x4¼x5 ins. high.
 Mounting holes—3¾x3¼ in. Weight—10 pounds.
 T-6793—Price\$4.80

6 TO 9 TUBES—2.5 VOLTS

For 6-27, 24 or 9-56, 57; 1-47, 2A5; 1-80.
 Secondary—700 V.C.T. at 70 m.a. 2.5 V. at 7 amp. C.T. 2.5 V. at 1.5 amps. C.T. 5 V. at 2 amps.
 Primary—V.A. 65. Dimensions—3½x3¼x3½ ins. high.
 Mounting holes—3½x2½ in. Weight—5 pounds.
 T-6362—Price\$2.10

6 TO 8 TUBES—6.3 VOLTS AND 2.5 VOLTS

For 5 or 6-76, 77, 78, 6C5, 6K7, 6F5; 2-47, 2A5, 45; 1-80.
 Secondary—700 V.C.T. at 70 m.a. 6.3 V. at 3 amps. C.T. 2.5 V. at 4 amps. C.T. 5 V. at 2 amps.
 Primary—V.A. 70. Dimensions—3½x3¼x3½ ins. high.
 Mounting holes—3½x2½ in. Weight—5 pounds.
 T-7021—Price\$2.10

7 TO 12 TUBES—2.5 VOLTS

For 5-24, 27, or 9-56, 58; 2-47, 2A5, 45; 1-80.
 Secondary—700 V.C.T. at 80 m.a. 2.5 V. at 9 amps. C.T. 2.5 V. at 3 amps. C.T. 5 V. at 2 amps.
 Primary—V.A. 75. Dimensions—3½x3¼x3½ ins. high.
 Mounting holes—3½x2½ in. Weight—6 pounds.
 T-6363—Price\$2.40

UNIVERSAL MOUNTING—TYPE 2U

9 TO 13 TUBES—2.5 VOLTS

For 6-24, 27 or 10-56, 57; 2-47, 2A5; 1-80, 5Z3.
 Secondary—700 volts C.T. at 110 m.a. 2.5 volts at 10.5 amps. C.T. 2.5 volts at 3.5 amps. C.T. 5 volts at 3 amps.
 Primary—V.A. 100. Dimensions—3½x3¼x4¼ ins. high.
 Mounting holes—2½x3¼ in. Weight—7 pounds.
 T-7544—Price\$2.70

8 TUBES—6.3 VOLTS

For 5-76, 6C6, 6D6, 6K7; 2-42, 6F6; 1-83, 5Z3, 5Z4.
 Secondary—775 volts C.T. at 200 m.a. 6.3 volts at 3 amps. C.T. 5 volts at 3 amps.
 Primary—V.A. 135. Dimensions—3¼x4¼x5 ins. high.
 Mounting holes—3x3¼ in. Weight—10 pounds.
 T-6935—Price\$4.20

11 TUBES—6.3 VOLTS AND 2.5 VOLTS

For 5-76, 6D6; 4-2A3; 1-82; 1-83.
 Secondary—870 volts C.T. at 250 m.a. (Bias tap at 80 volts). 6.3 volts at 1.5 amps. C.T. 2.5 volts at 10 amps. C.T. 2.5 volts at 3 amps. 5 volts at 3 amps.
 Primary—V.A. 160. Dimensions—3¼x4¼x5 ins. high.
 Mounting holes—3¾x3¼ in. Weight—10½ pounds.
 T-7550—Price\$4.80

8 TUBES—7.5 VOLTS AND 2.5 VOLTS

For 2-50; 5-56; 1-83.
 Secondary—1100 volts C.T. at 150 m.a. 7.5 volts at 2.5 amps. C.T. 2.5 volts at 5 amps. C.T. 5 volts at 3 amps.
 Primary—V.A. 160. Dimensions—3¼x4¼x5 ins. high.
 Mounting holes—3¾x3¼ in. Weight—10½ pounds.
 T-6826—Price\$3.90

SPEAKER FIELD SUPPLY

Secondary will furnish: 115 volts D.C. at from 50 to 250 m.a. for 1 to 6 fields. 5 volts at 3 amps. for 83.
 Primary—V.A. 55. Dimensions—3¾x3¼x3¼ ins. high.
 Mounting holes—3¼x1½ in. Weight—5½ pounds.
 T-6797—Price\$2.55

JUST OUT!

Tru-Fidelity

BY
THORDARSON

These new High-Fidelity Transformers are designed for highest efficiency, ease of installation, and permanent performance. The single hole mounting feature allows the transformer to be rotated to any angle to balance hum and allows mounting so terminal board is on top or bottom. Threaded to fit standard microphone input plugs, etc. Response obtained from 20 to 20,000 C. P. S. and flat from 30 to 10,000 C. P. S.

Line, mixer, or microphone to single grid.

Primary—500*/333/250/200*/125/50 ohms.
Max. operating level plus 10 D. B.
Secondary—75,000/18,750 ohms.
T-9000—Net price\$10.50

Push-pull tubes to line or mixer.

Primary—20,000/5000 ohms for 56, 76, 864, 6C6, or 6J7 triodes,
Max. operating level plus 20 D. B.
Secondary—500*/333/250/200*/125/50 ohms.
T-9001—Net price\$10.50

Single tube to line or mixer.

Primary—20,000/5000 ohms for 56, 76, 864, 6C6, or 6J7 triodes,
Max. operating level plus 15 D. B.
Secondary—500*/333/250/200*/125/50 ohms.
T-9002—Net price\$10.50

Single Plate to single grid.

(No D. C. in primary)
Primary—10,000/2500 ohms for 56, 76, 864, 6C6 or 6J7 triodes,
Max. operating level plus 15 D. B.
Secondary—40,000/10,000 ohms.
T-9003—Net price\$6.00

Single Plate to push-pull grids.

(No D. C. in primary)
Primary—10,000/2500 ohms for 56, 76, 864, 6C6 or 6J7 triodes,
Max. operating level plus 15 D. B.
Secondary—160,000/40,000 ohms.
T-9004—Net price\$6.90

Push-pull plates to push-pull grids.

Primary—20,000/5000 ohms for 56, 76, 864, 6C6 or 6J7 triodes,
Max. operating level plus 20 D. B.
Secondary—45,000/11,250 ohms.
T-9005—Net price\$7.50

*Indicates inductive and capacitive balance to

Crystal microphone or Photo Cell to Line.

Primary—for P. E. Cell or Crystal Mike.
Secondary—500*/333/250/200*/125/50 ohms.
T-9006—Net price\$9.30

Push-pull power tubes to line.

Primary—5000/3000/1250/750 ohms (p. p. 2A3, etc.).
Max. operating level plus 32 D. B.
Secondary—500*/333/250/200*/125/50 ohms.
T-9007—Net price\$10.50

Push-pull power tubes to voice coil.

Same as T-9007 except secondary impedances 1.25/3.75/5/7.5/10 or 15 ohms.
T-9008—Net price\$10.50

Audio Reactor.

For parallel feed audio circuits, etc.
300 henries at 8 m. a. D. C. or 75 henries at 16 m. a. D. C.
T-9009—Net price\$6.00

Line or microphone to line or mixer.

Primary—500*/333/250/200*/125/50 ohms.
Max. operating level plus 10 D. B.
Secondary—500*/333/250/200*/125/50 ohms.
T-9010—Net price\$7.50

Line or microphone to push-pull grids.

Primary—500*/200*/125/50 ohms.
Max. operating level plus 20 D. B.
Secondary—150,000/37,500 ohms.
T-9011—Net price\$11.10

Line to voice coil.

Primary—500*/333/250/200*/125/50 ohms.
Max. operating level plus 30 D. B.
Secondary—1.25/3.75/5/7.5/10/15 ohms.
T-9012—Net price\$10.50

center tap for use on balanced transmission lines.

THORDARSON AMPLIFIER FOUNDATION UNITS

**NOW YOU CAN BUILD THE FINEST 6-18-30 OR 60-WATT AMPLIFIER!****Note These Outstanding Features:**

- Crystal, Ribbon, Dynamic, or Carbon Microphone may be used without changing the circuit!
- New input circuit—over-all gain compensated for any type input circuit.
- Low and high impedance input terminals for radio, phono-pickup, or line input!
- Ample microphone current for double-button carbon unit.
- Pre-amplifier is an integral part of the circuit.
- Entire amplifier operates from 110-120 volts, 60-cycle A.C.
- All parts of standard manufacture and readily obtainable.

Complete building instructions including diagrams, layout and photos.....15c

6 Watt Foundation KitConsists of drilled chassis, sub. assembly, input and output terminal strips and complete instructions.
No. T-7506—Net\$2.70**18 Watt Foundation Kit**Consists of power supply base with sockets, amplifier base with sockets, sub assembly, input and output terminal strips, complete instructions, diagram, and assembly.
No. T-7518—Net\$3.60**30 Watt Foundation Kit**Power supply base with 4 sockets, amplifier base with 12 sockets, sub assembly base, input and output terminal strips and complete instructions, assembly plans and diagram.
No. T-7530—Net\$4.80**60 Watt Beam Power Amplifier Kit**

Circuit diagram and complete parts list available on request.

We Maintain a Very Complete Stock of Exact Duplicate Transformers.

We Can Furnish Duplicates of Many Sets Not Listed or Rewind the Old One

*While our small present stock lasts a few orders will be filled with Freed transformers. We list only the most popular receivers but can supply exact duplicates for nearly any receiver manufactured. Old transformers can be rebuilt. Don't try to make a "mis-fit," write us for quotation or send us the old unit. The cost is reasonable.

CLOUGH-BRENGLE

SUPER-SERVICE
INSTRUMENTS

Model CRA

**\$84.50**

Housed in heavy metal case, finished in black crystalac. Etched silver finish.

"INDUCTOR SWEEP"

SERVICE INSTRUMENTS

The CRA Oscilloscope

- Input sensitivity, .38 R.M.S. volts per inch.
- All controls on front panel.
- Wide range sweep circuit (up to 20,000 c.p.s.).
- Automatic synchronization.
- Oversize dual power transformer.
- Separate horizontal and vertical amplifiers.
- Shipping weight, 42 lbs. Complete with tubes.

Buy it on easy payments, **\$9.50** cash and **\$8.36** a month for 10 months. Used with Model OM-A illustrated and described on right, you can now own the most modern, accurate equipment money can buy at prices and terms within your means.

Model OM-A

The OM-A
Oscillator**\$57.75**

- Exclusive C.B. "inductor sweep."
 - Built-in frequency modulator.
 - Sine wave modulation.
 - Constant sweep width.
 - Frequency range, 100 kc. to 30 mc.
 - Guaranteed accuracy, 1/2 of 1%.
- Own it on easy payments, **\$6.50** down and 10 monthly payments of **\$5.85**.

C.B. MODEL 99 SIGNAL GENERATOR

- R.F. output calibrated in microvolts.
- Adjustable modulation percentage.
- Hand calibrated direct reading dial.
- Guaranteed accuracy, 1/2 of 1%.

\$43.90

Easy payment price, **\$5.00** down and 10 monthly payments of **\$4.44** each.

- Range, 100 kc. to 60 mc. on fundamentals.
- New all metal tubes.
- Tuning dial 25 inches long per band.
- Six range roto-inductor assembly.
- Adaptable to cathode ray use without alterations.

MODEL 79A BEAT FREQUENCY OSCILLATOR

- 150 milliwatt output (14 db.).
- Linearity plus or minus 1% from 1,000 cycle level.
- New metal tubes. No matching required.
- May be used to modulate R.F. Osc.
- Guaranteed less than 5% wave from distortion.

\$53.75

On time payments for **\$6.00** down and 10 monthly installments of **\$5.45** each.

- Frequency range, 50 to 10,000 cycles.
- Cathode ray zero beat indicator.
- Accurately calibrated.
- Thorough filtering of R.F. from output.
- 8-inch dial scale for easy setting.

IMPROVED MODEL OC-A OSCILLATOR

- Frequency range, 100 kc. to 30 mc. on fundamentals.
- Calibrated for use of 60 mc. harmonic range.
- 25-inch dial length per band.
- Guaranteed 1/2 of 1% hand calibration.
- Checked against crystal standard.

\$29.95

On easy payments, **\$4.50** down and 7 monthly payments of **\$4.20** each.

- New all metal tubes.
- Modulated or unmodulated output.
- 400 cycle sine wave output.
- Adaptable for use with cathode ray tests.
- New output attenuator controls.

Limited space does not permit us to show all Clough-Brengle equipment. If interested in other models, write us for literature and prices.

Supreme

STARTLING NEW ENGINEERING DEVELOPMENTS

NEW! SUPREME CATHORAY OSCILLOSCOPE

These features in addition to those found in other models make this an outstanding value.

- Self contained, complete power supplies.
- Separate horizontal and vertical amplifiers.
- Amplifier input resistance of 500,000 ohms.
- Maximum input potential, 800 volts.
- Frequency range 20 to 90,000 C.P.S.
- Sensitivity of 2 peak volts per inch.
- Linear time base (Saw Tooth Osc.) included.
- Deflecting plates accessible direct or through amplifiers.
- Synchronization of linear time base with input voltage.
- Synchronization of time base with power supply.
- Complete with R. C. A. 906, 885, 879, 80 and 2-57's.
- Fully shielded metal case. Complete instructions.

S. I. C. Easy Payment Price, \$10.00 cash deposit and 12 monthly payments of \$7.68.

Model 545
Cathoray
Oscilloscope

\$92.95

Model 555

Diagnoscope

\$147.95

RADICALLY DIFFERENT!

The Instrument of Tomorrow

Supreme Diagnoscope

The most complete instrument of its kind on the market.
Self contained, compact and precise.

- Frequency modulated signal of constant band width.
- Variable between 125 K. C. and 15 megacycles.
- Built in dual purpose signal generator (direct reading).
- Beat frequency audio oscillator 50 to 10,000 C.P.S. (constant output).
- Fixed frequency (400 C.P.S.) modulation built in.
- "Saw tooth" oscillator 7 to 20,000 C.P.S.
- Phase shifting facilities for study of Lissajou's figures.
- High gain flat response horizontal and vertical amplifiers.
- Provisions for external use of built-in oscillator and audio signal.
- Screen calibrated in K. C. off resonance.
- Component circuits may be used individually.
- Complete, compact, accurate, flexible.

S. I. C. Easy Payment Price, \$15.00 cash deposit and 12 monthly payments of \$12.05.

DIAGNOMETER**

\$96.95

- Supreme "Quadrimeter" with double viewing windows.
- A.C. volts, D.C. volts, D.C. mills, capacity, ohms, D.B. ranges, output ranges!
- A.C., D.C., volts and mills ranges: 0/7/35/140/350/750/1,400.
- D.C. amperes 0/14 (external only).
- Resistance 0/2,000/20,000/200,000/2 meg./20 meg.
- Capacity 0/.07/35/1.4/3.5/7/14 mfd.
- D.B. ranges —10 to plus 6, 0 to plus 16, plus 10 to plus 26, plus 20 to plus 36, plus 30 to 46.
- Output ranges (same as A.C. volts).
- Colored English reading tube tester scale.
- English reading condenser leakage scale.
- 0/200 ohms low range ohmeter.
- Balance ratio tube test circuit.
- Free reference point analysis system.
- Evenly spaced A.C. readings.
- Antique bronze finish. Hardwood case.

S.I.C. Easy payment price \$10.00 cash deposit and 12 monthly payments of \$8.00.

**MODEL 550
RADIO
TESTER**

\$55.95

Reads AC-DC volts, DC mills 0 to 1400 in 6 ranges.

Reads capacity from .07 to 14 Mfds. in 6 ranges.

Reads resistance from 0 to 20 meg. in 5 ranges.

Reads DB from —10 to +46 in 5 ranges. Has output meter ranges, leakage tester, power supply, and complete free reference. Point System for analysis.

S.I.C. Easy payment price \$6.00 cash and 10 monthly payments of \$5.55.

Combines features of Deluxe tube tester with unimeter functions, has neon short test. English reading dial for tube test. Tests condensers for leakage. A.C., D.C. volts and milliammeter ranges 0 to 1,400 in 4 ranges. Reads resistance 0 to 20 meg. in 5 ranges. Reads from —10 to +26 D.B. in 3 ranges.

S.I.C. Easy payment price \$7.50 cash and 10 monthly payments of \$6.61.

**MODEL 500
AUTOMATIC**

\$66.95

**MODEL 580
DE LUXE SIGNAL
GENERATOR**

\$54.95

**Frequency
Modulated**

**MODEL 570
DE LUXE
OSCILLATOR**

\$31.95

90 K.C. to 60 M.C.

Frequency modulated output of constant band width.

Coverage from 125 K. C. to 60 M. C.

Timing voltages for cathode ray synchronization.

Beat frequency audio oscillator 50 to 10,000 C.P.S.

Provisions for external modulation of output.

Separate external connections for audio output. S.I.C. plan \$6.00 down and 10 payments of \$5.44 each.

The Model 570 Deluxe contains many of the Model 580 features except the cathode ray modulator and beat frequency oscillator.

S.I.C. plan \$4.00 down and 8 payments of \$3.90 each.

NEW : SUPREME : INSTRUMENTS : 1937

MODEL 450 STANDARD SET TESTER

Model 450.

Net price.....**\$34.95**

An up-to-date test instrument with all popular ranges for average radio service. Simple and accurate, 28 ranges are included. A.C.-D.C. volts, D.C. mls., on scale reading 0/7/35/140/350/700/1,400 and ohms to 400,000 in three ranges with provisions for using external battery to read 4 meg. Complete free reference point system provided.

SIC—Easy payment price, \$4.00 cash and nine monthly payments of \$3.82.

MODEL 400 STANDARD TUBE TESTER

Model 400.

Net price.....**\$38.95**

A high quality tube tester so reasonably priced as to be in the range of every service man's means. Incorporates all standard tube tester functions such as leakage, quality, separate diodes, etc., in addition to D.C. volts and mls. 0/7/35/140/350/700/1,400 and ohms 0/4,000/40,000/400,000 with self contained batteries.

SIC—Easy payment price, \$4.50 cash and ten monthly payments of \$3.83.

MODEL 525 SOLDERING TOOL

The greatest individual contribution to the art of soldering in many years. Unexcelled for radio, telephone and general soldering.

Three definite, different core heats controlled by cord switch, together with adjustable soldering rod provide a great number of possible tip temperatures.

Non-scaling copper soldering rod may be extended 6 inches maximum from heating body to reach locations totally inaccessible with straight soldering tools. Either end of soldering rod may be used by simply turning tool over in the hand, thus allowing two different types of points for instant use.

Soldering rod easily removable for pointing and shaping. Soldering rods obtainable in a variety of shapes.

New working comfort with perfect mechanical balance is allowed by the handle mounted at right angles to the heating body.

Pivot mounting allows heating body to be set at any angle from parallel to approximately 110 degrees with handle thereby allowing additional flexibility to meet working conditions.

Heating unit which is easily replaceable reaches working temperature quickly. Wattages: 75 watts for general light work; 125 watts for medium work and rod extensions to approximately 4 inches; 200 watts for quick heating from cold, heavy duty soldering and for rod extensions to 6 inches.

Weight approximately 18 ounces. Also available in single heat models.

Triple heat.....\$6.75

Single heat.....6.00

MODEL 490 STANDARD MULTIMETER

Model 490.

Net price.....**\$22.95**

Here is just the unit thousands of radio servicemen, amateurs and general experimenters are looking for. A really good multi-meter. This new Supreme Model 490 Standard has the same meter circuit and ranges as the Model 450 set tester but does not include the set testing cable. Uses the Supreme 5-inch fan shaped meter with a 500 microampere movement. Incorporates 28 ranges: 0/7/35/140/350/700/1,400 D.C. volts, 0/7/35/140/350/700/1,400 A.C. volts, 0/7/35/140/350/700/1,400 D.C. mls., 0/4,000/40,000/400,000 ohms with provision for external forty-five volt battery to 4 megohms, and 0/7/35/140/350/700/1,400 A.C. volts output ranges.

S.I.C. easy payment price, \$4.00 cash and five monthly payments of \$4.25.

MODEL 510 METER KIT

The new Quadrimeter included in this kit employs a bi-indicating needle and a 1-mil. movement having a sensitivity of 1,000 ohms per volt. Dual viewing windows which can be illuminated by dial lights. The meter measures $5\frac{1}{4} \times 7\frac{1}{4}$ inches and has a dustproof bakelite cover which is removable. In combination with the parts kit, twenty-seven ranges are available, 0/7/35/140/350/700/1,400 volts A.C., 0/7/35/140/350/700/1,400 volts D.C., 0/7/35/140/350/700/1,400 milliamperes D.C., 0/2,000/20,000/200,000 ohms and six output ranges of 0/7/35/140/350/700/1,400 volts A.C. The parts kit includes one Supreme Bi-Indicating Needle Quadrimeter, one meter adjustment resistor, 15 resistors with 6 attached matching capacitors, 1 0-3,600 ohm potentiometer, one A.C. rectifier and all necessary switches.

Model 510.

1937

RADIO TEST INSTRUMENTS

MODEL 500 COMPLETE "SERVICE LAB"

DISPLAY VALUE

The Jackson "Service-Lab" is the most impressive and elaborate equipment installation ever offered to the servicing profession. This "Display Value" impresses the customer with the importance and necessity of precision workmanship. The "Display Value" offered by the Model 500 "Service-Lab" will be used advantageously this year by many service shops to increase the price charged per job.

Standard Relay Rack Style.
20 ins. wide—38 ins. high.

RELAY RACK CONSTRUCTION

The most modern equipment installation available at any price. Complete in every respect, including:

- Cathode Ray Oscillograph
- R.F.—A.F. Test Oscillator
- Frequency Modulated Oscillator
- "Dynamic Output" Tube Tester
- Complete Circuit Tester
- Full Range Universal Test Meter

The "Service-Lab" is designed to help you increase your profits. With the Type 500 you can speed up your work, do a more accurate job and receive a much better price.

This complete laboratory consists of the following Jackson test equipment described on these pages: Model 520 cathode ray oscillograph, Model 540 frequency modulated R.F.—A.F. oscillator, Model 585 dynamic analyzer; all mounted in sturdy relay rack. Can be purchased on easy payment plan as follows: \$49.50 down and \$26.00 per month for 6 months, or \$49.50 down and \$16.00 per month for 10 months. Other terms can be arranged if necessary. Let us know your requirements. See outline of time payments on second page.

Model 500—Complete "Service-Lab" (Net to Dealer)\$199.50

CATHODE RAY OSCILLOGRAPH

MODEL 520

All controls on front of panel and grouped so as to separate the three distinct functions of these controls. Maximum input sensitivity of both sets of plates is .75 volts R.M.S. per inch of deflection. Saw-tooth oscillator range 10 to 20,000 cycles allowing ready inspection of frequencies up to 100,000 cycles. Attractively finished in black Morocco with control plates etched in black on white metal background. Dimensions: 10 1/4 x 9 1/4 x 18 1/4. Shipping weight, 35 lbs. Complete with all tubes, ready to operate.

Price (Net to Dealer) . . \$79.50

FREQUENCY MODULATED TEST OSCILLATOR MODEL 540

Self-contained frequency modulator is electronic type.

NO MOTOR OR ROTATING PARTS ARE EMPLOYED

The Model 540 is basically a high grade test signal generator, but in addition contains a built-in "Frequency Modulator." Frequency sweep is provided with constant band width at all frequencies.

SPECIFICATIONS

FREQUENCY RANGE—100 kilocycles to 70 megacycles—all direct reading. **LARGE GLASS-ENCLOSED SCALE**—total effective scale length is 72 ins. Knife-edged pointer is attached directly to condenser shaft. Condenser drive is slow-motion planetary type.

SIGNAL OUTPUT—Either audio modulated or frequency modulated. Maximum signal is sufficient for any receiver. Two circuit attenuator provides variable ratio and also vernier control.

SHIELDING—Case is one-piece cast aluminum. Important circuits are isolated by excellent mechanical construction. All control shafts are at ground potential.

FREQUENCY MODULATION—The electronic sweep method is vastly superior to other methods now in use. No motor or rotating parts are required, therefore the sweep circuit remains in permanent adjustment and does not become inaccurate due to friction, wear, or dislocation. Furthermore, the electronic sweep provides a uni-directional frequency trace on the oscillograph screen. No reverse sweep appears and thus the confusion of double trace is eliminated. For securing visual resonance curves in connection with a standard oscillograph. The frequency modulation accomplished in the Model 540 (electronic method) produces a single image curve on the Cathode Ray screen. The band width of this image is automatically maintained at 30 Kc. regardless of the frequency delivered by the oscillator.

Operates from 110-volt 60 cycle A.C. line supply. Dimensions—11 1/2 x 8 3/4 x 4 1/4 ins. Shipping weight, 19 lbs.

RADIO TEST INSTRUMENTS

MODEL 580 DYNAMIC ANALYZER
SPECIFICATIONS:

TUBE TESTER—Tests over 200 types of tubes including all metal and metal-glass types. The test method is the well known Jackson "Dynamic Output" test. Tests each diode plate separately—also both sections of dual class B tubes and both plates of all rectifiers. Special tests for Pentagrid converter types.

METER RANGES—D. C. Volts—0-7.5/75/150/300/750/1500. D. C. Milliamperes—0-7.5/75/150. A. C. Volts—0-15/150/1500. Ohms—0-100/100,000/1 meg/10 meg. Microfarads—.001 to .15/.01—1.5/1-15. Decibels—10 to +18. All ranges are direct reading and any desired range can be instantly selected by the "Meter Selector" switch.

CONSTRUCTION—Main panel is one piece cast aluminum 19 inches long, 10½ inches wide. Control panels are etched metal having a white background and black characters. Case is genuine oak, measuring 19½ inches by 13¼ inches by 6 inches. Shipping wt., 23 lbs.

PRICE—Model 580 (less 8-wire cord and plug) (Net to dealer).....\$59.50
No. 908—CN 8 Wire Cable and Plug.....\$4.50

JACKSON "DYNAMIC OUTPUT" TUBE TESTERS

MODEL 535 Features

1. Dynamic Output Test—the most perfect method devised for accurate determination of tube condition.
2. Tests ALL tubes announced up to date. Provision for many more.
3. All readings direct on "Good—Bad" scale. No special marks for diodes, etc. Most simplified operation ever attained in a precision instrument.
4. Sensitive neon test for all shorts or possible leakage between elements.
5. Deluxe Multi-Meter ranges for volts, M.A., ohms, megohms. Also condenser test incorporated.
6. True "Unit Construction"—Socket plates removable and control panel removable. Protects instrument against obsolescence, should changes ever become necessary.

MAKES A COMPLETE, ACCURATE test on EVERY tube. Tests over 200 different types, including the new metal and metal-glass octal base tubes. Tests each diode plate separately, also both sections of Dual Class B tubes and both plates of all rectifiers. Special tests for Pentagrid Converter types.

DIRECT READING METER RANGES—VOLTS, OHMS, MILLIAMPERES. D. C. Volts—0-7.5, 0-75, 0-150, 0-300, 0-750, 0-1500. Milliamperes—0-7.5, 0-75, 0-150. Ohms—0-100, 0-100,000, 0-1 megohm, 0-10 megohms. All ranges direct reading. Ohms range in sensitive from 1/10th Ohm to 10 Megohms. Does not require external battery for megohms.
Cast Aluminum Panel—Etched metal control plates—solid oak case, dimensions 12¾x13¼x6 in. overall. Shipping wt., 17 lbs.

MODEL 427-A

SPECIFICATIONS:

DIRECT READING METER with colored dial. Meter is 3¼ in. TESTS ALL TUBES, INCLUDING METAL TYPES. NEON SHORTS TEST.

"DYNAMIC OUTPUT" TEST makes complete tests on all multi-element tubes such as diodes, etc.

HIGH QUALITY CONSTRUCTION. Solid oak case, Bakelite panel tapped primary line voltage control, rugged sockets, designed to accommodate future types of tubes.

MAY BE USED FOR OTHER TESTS by the addition of a simple attachment. Measures D.C. volts, 0-50/500. D.C. MA. 0-50. Ohms 0-500,000. Also condenser test for shorts, opens and leakage. Attachment costs only \$3.75 (Catalog No. 428). Dimensions 11x11x5 ins. Weight, 9 lbs.

Model 427-A—Tube Tester—Net price\$29.50

RANGER-EXAMINER FREE POINT TESTER AND MULTIMETER

Model 640-740

Model 640-740 Combination Volt-Ohm-Milliammeter and Free Point Tester is adaptable for every purpose in voltage, current or resistance testing, by the free point direct contact and the plug-in methods.

Volt-Ohm-Milliammeter unit has a Triplet precision instrument. Scale readings: 10-50-250-500-1,000 A.C. and D.C. volts at 1,000 ohms per volt; (D.C. Accuracy 2%, A.C. 5%) 1-10-50-250 M. A.; 0-300 Low Ohms; High Ohms to 250,000 at 1.5 volts. Rheostat adjustment will take care of 15 volts for ohms readings up to 2.5 megohms. Batteries may be added, permitting readings in 250,000 ohms steps. Low ohms reads to 1/2 ohms,—the 25 ohms portion being in center of the scale. The backup method used is without appreciable contact or other errors. The current draw is only 1 M.A.

Model 640 Free Point Tester has five sockets for handling any type glass, metal-glass or metal tube. Panel includes eight automatic switch type and ten single action jacks.

Case is same as model described opposite.

Model 640-740. Net price.....\$27.00

PRECISION BUILT

A complete line of Radio Test Instruments. Brings to the serviceman everything required in portable instruments. Precision built. Extremely durable and compact. Laboratory accuracy. Low cost.

TRIPLETT

METERS USED THRUOUT

RANGER-EXAMINER SIGNAL GENERATOR AND MULTIMETER

Model 540-740

Model 540-740 has two instruments—Direct Reading All-Wave Signal Generator and Volt-Ohm-Milliammeter. With the 740 Volt-Ohm-Milliammeter the serviceman can locate most of the troubles common to radio receivers. Has Triplet precision instrument. This unit is the same as Model 740 described opposite.

The 540 Direct Reading Signal Generator has Plug-In type coils. Five frequency bands from 110 to 20,000 Kc., all fundamentals. Each coil is individually calibrated by an exclusive method of peaking with trimmer condensers built as an integral part of the coil. Guaranteed accuracy is 1% for broadcast and intermediate bands and within 3% for short wave bands.

Model 540 is completely shielded for static and magnetic fields. Attenuation and stability are outstanding features. Strong signals, both modulated and unmodulated, are furnished. The sturdy case is metal with built-in compartments, having snap-on covers, for accessories. Has strap handle. Case finish is electro black baked enamel. Panels are silver and black. Size of case is 11-7/16x7-1/4x4-1/4 ins. All batteries and two type 30 tubes are included with necessary accessories.

Model 540-740. Net price.....\$36.00

PRECISION QUALITY AT NEW LOW PRICES

RANGER-EXAMINER D.C. POCKET VOLT-OHM-MILLIAMMETER

Model 735

Model 735 is a pocket size D.C. Volt-Ohm-Milliammeter with selector switch, black molded case with all corners nicely rounded and ranges comparable to those of larger multimeters. Can be carried easily in the coat pocket. Provides measurements for every requirement of the serviceman on home calls and is suitable for extra utility use in the shop and laboratory. Ranges are 15-150-750 volts; 1.5-15-150 M.A.; 1/2-1,000 low ohms; 0-100,000 high ohms at 1.5 volts. External batteries may be used for higher resistance measurements. Has Triplet D'Arsonval type precision instrument with readings accurate within two per cent. Selector switch for all ranges and individual zero adjustment for resistance measurements.

Sturdy black molded case, 3-1/16x5-1/2x2-1/4 ins. high. Attractive silver and black panel. Battery and test leads with alligator clips are included. Approximate shipping weight, 3 pounds, 4 ounces.

Model 735. Net price.....\$10.80

PRECISION BUILT ALL-WAVE SIGNAL GENERATORS

Feature

Plug-In trimmer peaked coils.

Direct Reading—long scales.

All fundamentals.

Accuracy 1% broadcast band.

Accuracy 3% short wave bands.

Precision built.

Perfected attenuation.

Highest Quality.

Lowest Prices.

RANGER-EXAMINER DIRECT READING SIGNAL GENERATOR

Model 557

Individually calibrated Plug-In Type coils, setting a new standard of obtaining laboratory accuracy at low cost, are used with Model 557 Ranger-Examiner All-Wave Direct Reading Signal Generator. See description above for Model 540 oscillator.

Supplied in attractive black leatherette case. Silver and black panel. When closed case measures 12x6-1/2x5-1/4 ins. Approximate shipping weight, 12 pounds.

Model 557. Net price.....\$18.00

Model 554-A—Same as Model 557 but not Direct Reading. Calibrated graphs included for accuracies under 1% on any band.

Model 554-A. Net price.....\$14.40

Readrite

Direct Reading Tube Tester

1. Checks glass, metal and glass-metal tubes.
2. Applies proper load values to tube being checked.
3. Tests for slightest leakages and all shorts.
4. But four simple operations required.
5. Uses Triplett Model 221 meter with GOOD-BAD scale.

Readrite

Equipped With Triplett Meter

6. Meter especially protected against damage.
7. Unique shadow type A.C. meter for line volts adjustment.
8. Has double grid cap for metal and glass-metal tubes.
9. Sloping, all metal, silver and black panel.
10. Attractive quartered oak case with handle.

Greatest Tube Tester Value Ever Offered

Model 430 is designed to check all tubes speedily and accurately. Results noted on Direct Reading GOOD-BAD meter scale will convince the most skeptical buyer. This latest 1937 model applies the proper load to tubes under test. Be prepared for modern tube testing with this rugged and reliable tester. An up-to-the-minute 1937 tube tester. Five flush mounted sockets provide for the various tubes without the use of adapters. The lamp used to illuminate the special shadow type A.C. line voltage adjuster meter also indicates when tester remains connected to the power supply. The tester circuit is designed to indicate all inter element shorts and leakages.

A complete tester with attractive oak case and sloping silver and black metal panel. Must be seen and used before true appreciation can be had. Removable cover makes tester equally satisfactory for either counter or portable use. Up-to-date tube charts furnished to all registered users.

Model 431, same as Model 430, but with Readrite meter having GOOD-BAD Direct Reading Scale.

MODEL 430 **\$18.00**

MODEL 431 **\$14.40**

POINT-TO-POINT TESTERS

Model 720A is designed for speedy, efficient servicing on all radios including metal tube sets. Used to measure resistances, continuity, capacity and voltages and tubes. Has 8 wire cable which plugs into set sockets. Includes two meters—D.C. having scales—15-150-300-600 volts; 15-150 M.A. A.C. meter reads—0-10-25-150-750 volts. Complete with instructions, charts and accessories.

No. R720A\$15.00

No. R730A—Same as No. R720A but with Triplett Model 223 D.C. voltmeter having 1,000 ohms per volt and scale reading 15-150-300-600 volts.....\$18.60

SET TESTER

Model 710A—popular three-meter set tester is used to check all parts of radio tube circuits by plugging directly into receiving set socket on all sets including 8 octal metal tube models. D.C. voltmeter reads 0-20-60-300-600; D.C. milliammeter reads 0-15-150; A.C. voltmeter reads 0-10-140-700. Selector switch connects all D.C. circuits to D.C. voltmeter. Panel jacks provide individual range connections for the three meters. Black and silver panel in black leatherette case—size 10 $\frac{1}{4}$ x 8 $\frac{1}{2}$ x 4 inches. Comes complete with instructions, resistance and capacity charts and necessary accessories.

No. R710A\$16.50

No. R712A—Same as No. R710A but with Triplett Model 233 D.C. Voltmeter, 1,000 ohms per volt, reading 0-15-60-300-600\$22.20

WESTON MODEL 698 SELECTIVE SET SERVICER

Includes a Weston Universal Volt - Ohm - Milliammeter, equipped with a Model 301 instrument — a complete Model 666 Type 1-B Socket Selector Set—all necessary leads—a substantial leatherette carrying case and necessary instructions. The Weston Socket Selector Set prolongs the life of the Model 698 indefinitely. The Selector block mounts on top of the instrument by means of two pin terminals on its underside. Its ranges are: 750-150-15-7.5 volts A.C. and 500-500,000-ohms full scale, and 75-7.5 milliamperes D.C. only. Voltage, current, resistance and continuity measurements may be made in any radio receiver.

POWER LEVEL INDICATORS

Power Level Indicators are used to measure sound or noise levels in amplifiers for Public Address, Theaters, Broadcasting Station Equipment, etc. The Decibel Meter permits the operator to make instant adjustments to prevent sound blasting or distortion. Standard range furnished reads up 6 and down 10 decibels, zero decibel at 1.73 volts, 500 ohm lines, 6 milliwatts. Standard damping.

Decibel Meter

No. 321DB—Up 6 down 10 Decibel Meter. Price..... **\$12.00**
No. 221DB—Up 6 down 10 Decibel Meter. Price..... **11.00**

DECIBEL METER KITS

To increase range of Power Level Indicators. Readings advance in steps of 4 decibels with constant impedance of 5,000 ohms—up to 22 decibels. Above 22 decibels the impedance is approximately 1,300 ohms resistance per volt. Triplett Decibel Meter Kits are supplied for either constant or non-constant impedance. 500-ohm input line. Using a Decibel Meter Kit facilitates immediate adjustments and the elimination of distortion.

Model 150 Decibel Meter Kit—(Non-constant Impedance)—includes: Triplett Model 321 Decibel Meter, Selector Switch, 9 Wire-wound Multipliers on Molded Mounting Board, Hook-up Wire, Diagrams and Instructions.

Model 150 Decibel Meter Kit, complete. Price..... **\$20.00**
Model 200 Decibel Meter Kit—Constant Impedance (includes—same parts as Model 150 Kit, except it has Model 321 Constant Impedance Meter).

Model 200 Kit Meter has four studs allowing movement to be shunted without altering impedance over 50 ohms.
Model 200 Decibel Meter Kit, complete. Price..... **\$21.85**

TWIN INSTRUMENTS AND KIT

The Twin can be furnished in any combination of A. C. or D. C. instruments. The No. 1200 meter has the following scale readings: D. C., 10, 50, 250, 500, 1,000 volts at 2,000 ohms per volt; 1, 10, 50, 250 mls; 1,500 ohms, 1.5 and 3 megohms. A. C., 10, 50, 250, 500, 1,000 volts. Simultaneous readings on both instruments when connected in same or separate circuits. Used to balance loads in 3-wire circuits, detect line fluctuations when load readings are taken, measure antenna and modulation current and similar applications.

loads in 3-wire circuits, detect line fluctuations when load readings are taken, measure antenna and modulation current and similar applications.

No. 120—Twin Instrument.....	\$10.33
No. 1200—Kit, complete.....	16.67
No. 121—Special Selector Switch.....	1.67
No. 122—Shunt Board for 1, 10, 50, 250 M. A. readings; 1,500 ohms, 1.5 and 3 megohms; also series resistor for 1,500-ohm range.....	2.33
No. 123—Resistor Board for 10, 50, 250, 500, 1,000 D. C. volts and 50, 250, 500, 1,000 A. C. volts and current limiting resistors for 1.5 and 3 megohms.....	4.83

SEMI-PRECISION

RANGE MULTIPLIER RESISTORS

Popular sizes of resistors for use as meter range multipliers, 1-watt, semi-precision. The * marks resistors which allow for the 50-ohm internal resistance of the meter. When used with 0.5 mill. meters, divide volt range by 2.

Ohms	Volts	Ohms	Volts
1,450	* 1.5	50,000	50
2,950	* 3	60,000	60
3,500	3.5	75,000	75

ACORN PENTODE V. T. VOLTMETER KIT

Contains all materials required to build new Vacuum Tube Voltmeter Kit using new Type 954 Acorn pentode tube. Can be assembled in one hour. The ideal meter for servicemen, experimenters, etc. Small size (see probe above) permit tube itself to be placed at point of measurement, thus avoiding long leads and high input capacitances. Supplied complete down to last detail, except microammeter. Materials to assemble the flexible Acorn tube probe described above are also supplied. Complete instruction. Less tube and microammeter.

NEW! GRAFOLINE

"A Radio Contact Lubricant"

Eliminates noise on controls and contacts. Protects from dirt and dust.

"It Cleans As It Lubricates"

Net price.....**\$0.21**

G-C FINE OIL

"For the Shop, Office and Home"

This is a high quality fine oil that is specially suitable for radio work in lubricating dials, condensers, controls, etc. It also makes an excellent household oil, and can be used for electric motors, sewing machines, door hinges and a thousand other uses. 4-oz. can. Net price....**\$0.18**

NON-SLIP COMPOUND FOR RADIO DIALS

This compound is specially made for aiding in repair of slipping friction, and cable or cord driven dials. It is easy to use, as it comes in powder form and should be applied freely to slipping parts.

Net price.....**\$0.18**

TEST ADAPTERS—NEUTRALIZING TOOLS

NEW 9-WIRE OCTAL LOCKING TYPE ANALYZER PLUG

Complete Analyzer Plug, Cable, Cable Plug, Socket and Adapters

Twist locking analyzer plug with 5 ft. 9-wire cable and wired in dual grid stud. Cable fitted with 9-prong finger grip type cable plug. An 8 octal socket is included for mounting on analyzer panel. Five associated adapters for testing both the new all-metal tubes and regular glass bulb tubes included.

BOOKS BY GHIRARDI MODERN RADIO SERVICING

By

ALFRED A. GHIRARDI

A SENSATION! The greatest text ever published. 1300 pages. Construction and operation of latest radio test equipment—servicing of all forms of receivers—locating and eliminating interference—construction and use of new Cathode-Ray Oscillographs, (the first text book to have this)—explanation of AVC and QAVC circuits—advertising and merchandising tips. Written in clear, simple style—illustrated with 706 diagrams, photographs, charts, etc.

Net price \$4.00

SPECIAL—JUST PUBLISHED!

Radio Field Service Data and Answer Book (2nd Revised Edition)

JUST released! The latest newly revised and greatly enlarged edition of the handiest data book you ever saw. Intermediate frequencies of over 4,000 superhets—a section giving Case Histories of over 1000 models of radio receivers—remedies for ignition interference—latest tube charts—wire tables—all RMA Color Codes—and 25 other useful charts, diagrams and tables. Contains over 150 pages of added new material.

Net price \$2.50

SPECIAL OFFER:—Modern Radio Servicing in combination with new 2nd Edition Radio Field Service Data Supplement (listed above)..... \$6.00

Ghirardi's Radio Physics Course

The most popular seller today. This book needs no introduction. So much valuable information is contained in its pages, no serviceman can afford to be without one. Net price \$4.00

"MODERN TIMES DEMAND MODERN METHODS"

ON ALTERNATING CURRENTS IN RADIO RECEIVERS

A comprehensive book covering parallel and series resonant circuits... kinds of coupling... inductance, reactance, impedance, etc. A combination of theory and practice that explains alternating currents in a brand new way. Book No. 1, 80 pages.

ON RESONANCE AND ALIGNMENT

A clear explanation of resonance... types of circuits—single, double, and triple tuned systems... latest high-fidelity i-f. amplifiers. This book tells you everything you should know about all this in Rider's brand new combination of theory and practice. Book No. 2, 64 pages.

ON D.C. VOLTAGE DISTRIBUTION

Explains distribution of D.C. voltages from power unit to the elements of the tubes. Explains networks from the simplest to the most complicated. The calculations of the value of the resistors and their wattage ratings are clearly described in this brand new combination. Book No. 3, 64 pages.

ON A. V. C.

Treats on modern automatic volume control. Noise suppression systems... time delay circuits... audio frequency volume expander systems and other such networks. A complete description of how these circuits operate written in a brand new manner. combining theory and practice. Book No. 4, 64 pages.

Q. S. T. SUPER-REGENERATOR 5 METER KIT

The following list of parts represents the most important fundamental parts necessary to build the Novel Q.S.T. Pentagrid Converter 5 Meter Super Regenerative Ultra High Frequency Receiver as described in the May, 1936, issue of Q.S.T.

All parts are included except resistors, mica and tubular condensers, a list of which is enclosed with each kit and which are available in every jobber's stock of parts.

In this kit we have included all the important items that are fundamentally necessary to build this kit, and which are manufactured by ICA.

- 1—No. 111 ICA 15 mmf. Insulex Midget Condenser, complete with Hardware.
- 1—No. 1641 Special Shielded Quench Frequency Oscillator Coil.
- 1—No. 1646—5 Meter High Frequency R.F. Choke Coil.
- 1—No. 1650—5 Meter Tuning Coil.
- 1—No. 2232—3½-inch Black Satin Finish Etched Dial with Silver Numerals.
- 1—No. 1156—2¼-inch Black Bakelite Bar Knob.
- 1—No. 2402—6 Terminal Strip.

- 1—No. 2481—5-Prong Wafer Bakelite Socket.
- 1—No. 2483—7-Prong Wafer Bakelite Socket.
- 1—No. 2419—Antenna and Ground Binding Post Strip.
- 1—No. 1143—Twin Tip Jack.
- 1—No. 3815—6x7¼x4¼-inch Black Crystalline Finish Drilled Cabinet.

- Two preselector stages.
- Single Signal (Crystal Filter) standard equipment.
- Ganged Plug-in coils, with each coil individually shielded.
- Strictly single-control Tuning.
- Calibration for each range mounted on coil.
- Four gang precision condenser, with preloaded worm-drive tuning, 20-1 ratio.
- Micrometer dial, spreading tuning over 500 divisions, numbered every 10 divisions, direct reading.
- Automatic or Manual Volume Control.
- Vacuum Tube Voltmeter with Instrument calibrated in R scale of carrier intensity.
- Electron Coupled, air padded oscillators.
- Two I. F. stages with Litz-wound coils, air condenser tuned.
- Beat Frequency Oscillator for "Offset" C.W. Tuning.
- Phone Jack on Panel.
- Relay rack mounting available.

Tubes Used: 2½ volt type—4-58, 3-57, 1-2B7, 1-2A5. 6.3 volt type—4-6D6, 3-6C6, 1-6B7, 1-42.

HRO—Amateur Receiver—table model—complete with coils to cover 1.7MC to 30MC and with full set of laboratory matched tubes (2½ V.) but without power supply and speaker\$167.70

(Supplied with 6.3 volt tubes if specified but not recommended for A.C. operation.)

HRO—In relay rack type—complete as listed above. Price\$179.70

Speaker)

HRO JUNIOR RECEIVER

For those who need the high performance of the HRO, but do not require its extreme versatility, a Junior model is offered. The circuit details of both receivers are identical in every respect, but the lower priced model has been greatly simplified by omitting the CRYSTAL FILTER and the S-METER, and by designing coils for "continuous band spread" only. Although these omissions do not greatly restrict its usefulness, they make it possible to price the Junior HRO at a very attractive figure. A complete description of the HRO Junior and of the Standard HRO will be mailed on request.

HRO Junior—With tubes, one set of coils, 10 to 20 meters (2 amateur bands). Amateur Net.....\$99.00
5897 AB Power Pack—for above—less tube. Amateur Net 15.90
Additional HRO Jr. Coils—per range—(2 amateur bands) 9.90

BAND SPREAD MIDGETS

These condensers are designed for use as band spread tuning condensers for S. W. Receivers and for use in amateur band frequency meters. The "tank" section can be set and locked at any desired capacity permitting the tuning section to spread narrow frequency ranges over entire dial, regardless of the range of the band or the coils used.

PRECISION PRODUCTS

The New
"SUPER-PRO"
*No equal at any
 price*

These Features Give the
"Super-Pro" an Edge
 Over All Others

- *Uses FIFTEEN of the new type, Higher Efficiency Tubes.
- *It's an All-Band Receiver—Range is 15 to 560 Meters.
- *An efficient Front-of-Panel 5-Band Switch. NO Plug-In-Coils.
- *Band Spread Tuning on all Bands.
- *Volume and Radio Frequency gain are regulated by individual controls.
- *Switch for disconnecting B Supply when transmitting.
- *Both Dials Highly Illuminated.
- *Beat Oscillator Switch on front panel.
- *Calibration of Dial Settings to better than 1/2% accuracy.
- *Electro-static shielded input.
- *18 Watts of available undistorted audio output when needed.
- *Class A prime Push-Pull audio system.
- *Designed for use on doublet, "double doublet" or any standard antenna system.
- *Lower Noise Level.
- *Two stages of Radio Frequency pre-selector stages—no image interference.
- *Three high gain, high Q, i.f. stages giving high selectivity.
- *Automatic and manually operated Volume Control.
- *Crystal filter system supplied if desired at small additional cost.
- *Air-tuned R.F. Transformers throughout—High Q Circuit design.

STANDARD COMET PRO
 Still Available

This popular receiver is still being built by Hammarlund for those who want a better receiver than average.

Standard Pro with tubes.....\$ 97.20
 With crystal 115.20

Complete coverage from 20 megacycles to 540 K.C. (15 to 560 meters) is provided. This range is covered in 5 bands which are changed by means of a specially designed switch with silver-plated multiple contacts which automatically short circuit all coils not in actual use. The main dial is accurately calibrated in megacycles from 2.5 m.c. to 20 m.c. and in kilocycles from 540 to 2,500. Only the scale in actual use is visible. This is accomplished automatically when the band switch is set. The "Super-Pro" receiver consists of two major units—receiver proper and power unit. Rack mounting with dust covers available.

Code SP-10—Standard "Super-Pro" with power supply; tubes, and Jensen C8R communication type 8-in. electro dynamic speaker. Price.....\$228.00

FEATURES

★ CONTINUOUS BAND-SPREAD—Over entire tuning range—wide spread on all Amateur Bands and Foreign Broadcast Bands.

★ 10 TO 550 METER TUNING RANGE—Continuous without any skips.

★ 7-TUBE SUPERHETERODYNE CIRCUIT—A.C. operated—power supply built-in. Can be furnished as a 6-tube Super, leaving out Beat-Note Oscillator. Uses latest tubes—2A7 Oscillator and first Detector, 58 1st I. F., 58 2nd I. F., 56 2nd Detector, 58 E. C. Beat Oscillator, 2A5 Pentode Power tube and 80 Rectifier.

★ Pre-adjusted coils—Oscillator and I. F. coils are pre-set—eliminating need of alignment.

★ Super sensitivity and selectivity. High gain I. F.'s on New 370 K. C.

OTHER FEATURES—Standard parts used throughout, Speaker Volume, Airplane Dial, Tone Control, Eraydo finished Panel and Subbase, etc.

SHORT WAVE RADIO RECEIVERS

Lew Bonn Co. carries, in stock all the time, all of the receivers listed on these two pages as well as a full stock of National and Hammarlund receivers. When new models are brought out, Lew Bonn Co. is one of the very first to order them so that we can test them out and give you our opinion of their

merits. All of the receivers we list in this catalog have proven their ability to please amateurs with real FB performance. Remember, Lew Bonn Co. is willing to help you own a GOOD receiver through our time payment plan.

NEW RME-69

The RME-69 is the 1936 successor to the famous RME-9D. This precision-built communication type receiver has proven to be one of the very best in performance. Now features continuous band-spread tuning on six bands from 9 to 650 meters. The amateur bands are grouped for a minimum amount of tuning. New, large, improved dials. Built-in monitor for both phone and C.W. Heavy black crackle finish metal cabinet is 19 in. long, 10½ in. deep and 9 in. high. Has calibrated micro-volt "R" meter. Uses the expensive electrical (condenser) system of band-spreading. Uses the 6.3 volt tubes as follows: 6D6 R.F. amplifier, 6D6 oscillator, 6C6 first det., two 6D6 I.F. amplifiers, 6B7 second det., A.V.C., and first audio, 6D6-B.F. osc., 42 A.F. output and 80 rectifier—nine tubes in all. Has single signal crystal filter (Bliley 456 Kc.) as standard equipment. Has the following front panel controls: Line switch and tone control combined, beat freq. osc. adjustment, headphone jack, manual gain control, resonator control, band change switch, volume, A.V.C. and send-receive switch combined, beat osc. on-off switch, crystal selectivity control and crystal filter switch as well as the two main tuning controls.

RME-69—Single signal super receiver complete in steel cabinet with crystal and tubes but no speaker.....\$123.80
Rola permanent magnet dynamic speaker, 8 in. diameter, in metal cabinet to match RME-69..... 11.10

RCA NEW TRANSMITTERS

This new line of amateur transmitters consists of a number of units which can be assembled to make up either a 40 watt C.W., 40 watt phone, 260 watt C.W., or 200 watt phone transmitter. The amateur may purchase either complete assemblies or individual units.

ACT-40 (40 WATT PHONE AND C.W. TRANSMITTER)
This transmitter consists of an antenna coupling panel, an r-f unit, and a modulator unit as pictured at left.

ACT-200—(200 WATT PHONE, 260 WATT C. W. TRANSMITTER)
This transmitter consists of an antenna coupling unit, an r-f exciter unit, an r-f power amplifier unit, a modulator unit, and a high-voltage power-supply unit housed in a metal cabinet.

The ACT-200A antenna unit is similar to the ACT-40A except that parts having the necessarily higher ratings are employed. The ACT-200P power-amplifier unit uses two RCA-835 in push-pull.

Prices are subject to change or withdrawal without notice. Prices are less tubes, crystals, microphones, and all other accessories except one set of coils for one amateur band.

ACT-40—(Complete phone and C.W. transmitter).....	\$235.00
ACT-40A—(Antenna Unit)	37.50
ACT-40R—(R-F Unit)	110.00
ACT-40M—(Modulator Unit)	84.50
ACT-40C—(Metal Cabinet)	20.75
Extra coils for 40 watt transmitter, per set.....	7.50
ACT-200—(Complete phone and C.W. transmitter)....	475.00
ACT-200A—(Antenna Unit)	49.50
ACT-200P—(R-F Power Amplifier Unit).....	99.50
ACT-200M—(Modulator Unit)	99.50
ACT-200S—(Power-Supply Unit)	96.50
ACT-200C—(Metal Cabinet)	34.70
Extra coils for 200 watt transmitter, per set.....	7.50

THE NEW BRETING "14" DX RADIO

JUST OUT! Breting's new Model "14," with new improved features and famous Breting value.

Model "14"—14 tubes. Net price..... **\$99.00**
Write for bulletin.

Note: Illustration is of famous Breting-12 now superceded by the model 14.

RCA MODEL ACR-175

Tunes from 500 to 60,000 Kc. (5 meters)! Superheterodyne, 460 Kc., Iron-Core Intermediate-Frequency Transformers; crystal filter and automatic volume control. 10 metal tubes and one electron-ray tube.

3 RCA-6K7 r-f and i-f amplifiers; 2 RCA-6J7 oscillators; 1 RCA-6L7 first detector; 1 RCA-6H6 second detector and A.V.C.; 1 RCA-6F5 first audio; 1 RCA-6F6 audio output; 1 RCA-6E5 tuning and signal strength indicator; 1 RCA-5Z4 rectifier. All metal tubes except RCA-6E5, 8 in. dynamic speaker, crystal filter, Beat Osc., AVC and many other features. Model ACR-175. Net price.....\$119.50

★ BUILD YOUR OWN ★ ALL-STAR TRANSMITTER

Buy and build in easy stages—step by step! Start with a 40-watt unit and low-voltage power supply for CW operation. Add speech amplifier and power supply to make a 40-watt phone station, with simultaneous screen and plate modulation, giving a peak power of 160 watts. To increase power, add high-power R. F. amplifier and high-voltage power supply. This gives 500-watt CW transmitter. The same high-powered R. F. amplifier and high-voltage power supply, with the addition of the 200-watt modulator, gives a 400-watt plate modulated phone, with peak power of 1600 watts. All Units Are Inter-connected by Plug-In Cables so Units Can Be Readily Removed from Rack. Complete construction data and diagrams..... \$0.15

Midget Condensers — Dials — Neons

HAMMARLUND "STAR" MIDGETS

Single hole mounting. $\frac{1}{4}$ in. shaft. Low-loss bakelite insulation.

CRYSTALS - BAKELITE - RESISTORS

BLILEY CRYSTALS
AND HOLDERS

New Low Prices!

NEW LOW-DRIFT CRYSTALS

Oven equipment is not necessary as the frequency drift is guaranteed less than 8 cycles which is two-thirds less than that of an X-cut. Guaranteed 0.03% accurate calibration. Frequency engraved on each name plate. Greater output—excellent for Tri-tets. Choice of 40, 80 and 160 meter bands. Type LD-2—In special holder.....\$4.80

Type HF-2—14,000 to 14,400 within 15 Kc.....6.50
Within 5 Kc.....10.00
Type HF-2—14,400 to 14,900 within 15 Kc.....6.50
Within 5 Kc.....15.00

BLILEY X-CUT MOUNTED CRYSTALS

Type BC-3—Are power-type, larger, X-cut. In special holders. Supplied to specified frequencies within

Mt. Band	10 Kc.	5 Kc.	1 Kc.	Exact F.
14.15	\$3.95	\$4.90	\$5.90	\$7.50

We carry a large stock of both Bliley LD-2 and BC-3 crystals in stock and can usually come within 5 Kc. of the frequency you want. Exact frequencies in most cases will have to be ordered from the factory at exact frequency prices.

BLILEY CRYSTAL HOLDER

Bakelite dustproof plug-in 8-prong tube socket. Can be mounted in any position. BC3-3.....\$1.00
With CR plugs.....1.50
For 40-meter Kials, BC3-4.....1.00

W9FBU JOHN VESEL W9FBU
VESEL'S VALUE-PLUS BT-CUT CRYSTALS

John has been turning out the very best quality BT-Cut Crystals for the past six months. You will find them very stable in operation with practically no frequency drift and extra powerful in output. Vesel's Value-Plus Crystals are the most widely used in the Northwest—they satisfy 100% of your money refunded. Most of you know good of John, the Swiss watchmaker at Greenwood, Wis., as he is one of the best phone home on the air. John has been grinding crystals for years and you will like his product.

Vesel's Value-Plus BT-Cut Crystals in 150 or 80 meter bands within 10 Kc. of your specified frequency. Crystal only, no holder.....\$2.65
Can be furnished at exact frequency for 25% increased price. We carry a large stock and can usually come within 5 Kc. of your desired frequency.

NEW 40-METER BT CUT CRYSTALS

Very low drift and accurately calibrated. These new 40-meter crystals carry the same unconditional guarantee as John's 80 and 160-meter crystals with which you are so familiar. Not power crystal only.....\$3.50

OMAHA CRYSTAL LABORATORIES
X CUT CRYSTALS

For 40 meters. Each.....\$1.85

Omaha crystals are made from only the very best grade of Brazilian quartz which have been critically inspected and thoroughly tested before packing. Each crystal is individually tested and accurately calibrated before shipping.

Each crystal carries an unconditional guarantee of satisfaction. If for any reason a particular frequency ordered is not entirely satisfactory, if returned within 10 days, we will exchange the crystal for one of another frequency.

Many amateurs have found it necessary to struggle along with only one crystal due to the relatively high cost of each unit with the result that their frequency are unable to get out with their transmitters due to excessive QRM on their frequency.

With this thought in mind we offer you a quality crystal that is being supplied at a moderate price.

Specify frequency and allowances plus and minus when ordering. These crystals are accurately calibrated but we obviously cannot supply exact frequencies at these low prices.

We carry a full stock of bakelite, rods and tubing.

BLILEY NEW QSY (Variable Frequency)
CRYSTALS

A few pertinent facts: (See Cat. QSY 1934.)

- ◆ Same size and shape as LUF unit.
- ◆ Finger-tight frequency control.
- ◆ Same stability as LDI unit.
- ◆ 6KV-QSY on fundamental.
- ◆ 24KC variation at 20 meters.
- ◆ Mount in any position.
- ◆ Ideal for front of panel.
- ◆ Can replace present plug-in holder.

Furnished within 5 Kc. of frequency specified. (Remember they are calibrated at the minimum frequency.)

JOHNSON QUALITY PRODUCTS

New! E. F. JOHNSON CO. Announces New! MYCALEX INSULATED TRANSMITTING VARIABLE CONDENSERS

E. F. JOHNSON HI-Q TRANSMITTING INDUCTORS

New Low Prices!

High electrical efficiency is secured by carefully proportioned dimensions, generous conductor size, and the elimination of all insulating material from the inside of the coil. Special edgewise-wound copper strip conductor makes a compact, rigid inductor. Inductance can be accurately adjusted by clip placement. Taps for coupling or bandswitching can be tried and changed quickly.

TRANSMITTING COIL FORMS

GENERAL RADIO

TYPE 677 TRANSMITTER COIL FORM

This form is used in oscillators and power amplifiers in low and medium power transmitters. It is of impregnated moulded porcelain having low losses, and moulded with six heavy ribs on which the coil is wound. The form is 2½ inches outside diameter, 4½ inches long and has 21 V-cut threads occupying a winding space of 3 ins. Any size wire up to No. 10 B&S gauge may be used. Spacers and plug-jack bases are available so that the coils may be plugged in to the circuit. The bases are supplied with seven plugs and seven jacks, allowing any combination of standard circuit to be used. Grid and plate or

plate and antenna coils may be wound on one form for the higher frequency bands.

Transmitter Coil Form Assembly. Complete.....\$2.30

Type	Description	Price
677-U	Coil Form.....	\$0.50
677-Y	80-160 meters.....	.80
677-PI	Coil Form Spacer (2 Required)...	.35 per pr.

678-J	Jack Base with 7 Type 274-J Jacks	.70

ICA WOUND TRANSMITTING INDUCTANCES

These inductances are designed for use in amplifiers and transmitters, equipped with taps for neutralizing and antenna coupling coils. Precision winding with double silk covered wire. Forms are 2½ in. diam., are 3½ in. long, and are the 6-prong type. Designed for use with tuning condenser of 100 Mmfd. Wire size is No. 16 on 20, 40, 80 meter coils and No. 18 on 160 meter coils.

20 METER INDUCTANCE

Has 6½ turns spaced ¼ and tapped at 1½ turns. Antenna coil 6 turns close wound.

No. 12680.....\$1.20

40 METER INDUCTANCE

Has 12½ turns spaced ¼, tapped at 4½ turns. Antenna coil 6 turns close wound.

No. 12681.....\$1.20

80 METER INDUCTANCE

Has 20½ turns spaced ¼, tapped at 6½ turns. Antenna coil 10 turns close wound.

No. 12682.....\$1.20

160 METER INDUCTANCE

Has 42½ turns spaced ¼, tapped at 14½ turns. Antenna coil 15 turns close wound.

No. 12683.....\$1.20

BUD "GIANT" PLUG-IN COIL FORM

Special low-loss tan colored bakelite. Size, body of coil form, is 2-7/16 inches in diameter and 3½ inches long. Winding space, 3½ inches. Eight ribs extend ¼ inch out from body. Has moulded grip ridge.

No. B734—4-prong.....\$0.36

No. B735—5-prong......39

No. B736—6-prong......42

Also furnished with ribs grooved 12 turns per inch, for space winding.

No. B1221—4-prong.....\$0.50

No. B1222—5-prong......54

No. B1223—6-prong......57

ICA INSULEX TRANSMITTING PLUG-IN COIL FORM

Size 2¼x4 inches high. Low dielectric and absorption losses. Ideal for H.F. work. Heavy ribs stand well out from body.

No. 2660—7-prong, large.....\$0.75

NEW "LOCTURN" TRANSMITTING INDUCTANCES

"Locturn" self supporting coils produce the highest possible R.F. coil performance and efficiency. All have a "Q" over 350. Their much superior mechanical construction places "Locturn" coils far ahead of any product of their kind.

Characteristics and New Low Prices of "Locturn" Transmitting Inductors

VITROLEX FLUTED COIL FORM

No. CP-14—Here is probably the greatest value in a ceramic coil form of its size. Wound with No. 10 wire, its inductance is high enough to cover the 160 meter band in a high "C" circuit. It is beautifully glazed with a special highly brilliant glaze, is mechanically rugged, drilled with plenty of large holes for taps, for conveniently ending coil wire and mounting.

The coil form is 5 in. long by 2½ in. diameter and is threaded for 30 turns.

Price, net.....\$0.60

No. CP-52—Threaded for 28 turns for wire size up to No. 10 with holes every other turn. Specifications: Outside diameter, 3½ in.; length, 6½ in.; mounting centers, 5½ in.

No. 2160—6-prong15

ICA INSULEX COIL FORMS

Insulex is a non-hygroscopic ceramic compound, having very good low-loss qualities. Beautiful in appearance, these coils are slotted to eliminate necessity of drilling. Size 3 5/8 x 1 9/16 inches.

No. 952—4 prong.....\$0.30

No. 953—5 prong..... .33

No. 954—6 prong..... .36

No. 955—7 prong, large..... .39

UTILITY COIL ASSEMBLY

No. CP-18—This convenient plug-in type coil form consists of an unglazed Vitrolex tube dipped in Q-Max No. 3, 1 in. O.D. x 3 1/2 in. long, with six holes drilled in line. It is supplied with two banana plugs mounted in place at the ends. Additional plugs may be added.

Jack base provided is produced of Vitrolex and is supplied with two standard jacks. Additional jacks may be added if desired.

Price complete, net.....\$0.95

VITROLEX UNIVERSAL COIL FORM

No. CP-15—This coil form is unique in that it provides notches for winding coils of 10, 20 or 33 turns. By loosening the screws in the ends of the transverse Vitrolex bars, notches are available for small diameter wire or as large as 5/16 in. diameter tubing. One face of the bars is smooth and when this surface is turned outward, hand spaced windings may be made. For either experimental inductor construction or for permanent use, this Vitrolex coil is an ideal unit insofar as simplicity, coil efficiency, form factor, loss and ease of either soldering or clipping on taps are concerned. Shipped knocked down. Assemble quickly and easily. Outside dimensions 6 1/4 in. long by 4 in. diameter.

Type 86

NEW! CORNELL-DUBILIER CERAMIC CASE—HIGH VOLTAGE

High Amperage Mica Capacitors

Type 86 Condensers are hermetically sealed—capacity remains constant. Recommended for amateur and broadcast station plate blocking, grid and tank condenser applications.

CONCENTRIC TRANSMISSION LINE

Concentric transmission line is increasing in popularity in amateur radio. It provides a completely shielded line and is stable in operation under all climatic conditions. Low impedance, concentric cable of this construction permits impedance matching with very desirable antenna networks.

Constructed of specially drawn copper tubing having an inside diameter of 5/16 in. and No. 12 hard drawn copper wire. The inner conductor is supported in the tube on Ultra Steatite spacers which are crimped in place on the wire. The inner conductor is thus held concentric with respect to the tubing throughout its length. The ends of the tubing are then sealed with sulphur.

SPEEDX KEYS
No. 301—Moulded bakelite base, coin silver contacts. Metal parts chrome plate. Each\$1.10

No. 303—Same as No. 301 except has 1/4 in. contacts. Each\$1.25

No. 321—Heavy-duty type, 1/4 in. coin silver contacts. All chrome plated....\$1.95

No. 320—Same as No. 321 except has black crinkle base\$1.80

No. 311—Standard key. Has provisions for plugging in SpeedX Bugs. All chrome plated.....\$1.50

No. 310—Same as No. 311 except has black crinkle base\$1.35

No. 400—Constant frequency buzzer, bakelite top and base, adjustable, resist. 2 ohms\$0.65

No. 350—Bakelite replacement knob.....\$0.12

No. 450—Practice Set. No. 301 key and No. 400 buzzer mounted on base.....\$1.95

NEW SPEEDX "BUGS"

One of the finest automatic keys ever made.

Balanced to perfection and fully adjustable to give plenty of pep and life.

Fully Adjustable. Can be slowed down to eight words per minute or geared to as high a speed as desired. Standard construction throughout. Precision adjustment at all points. Solid 1/4 in. pure silver contacts. Heavy construction throughout. Will hold adjustment at ALL speeds.

No. 500—Black base\$6.90
No. 501—Chrome base 7.50

JUNIOR HI-SPEED KEY

The Junior No. 510 Key is a smaller model of the popular No. 500 HI-SPEED key. Fully adjustable to give plenty of PEP and LIFE. A favorite of the amateur who prizes his clean cut sending.

No. 510—Black base\$5.70
No. 511—Chrome base 6.30

Guarantee—Every SPEEDX Hi-Speed Key is manufactured to the highest standard of quality and is unconditionally GUARANTEED.

"SIGNAL" KEYS

NEW!
\$0.90

The new Signal Sales Leader. Heavy cast base, well insulated, black crackle finish, 1/4 in. coin silver contacts, nickel plated parts and compo. knob. A real value. No. R-50.....\$0.90

STANDARD TELEGRAPH TYPE KEY

The Key with the "Feel" Platinor contacts, rated at 1/4 Kw. Polished key lever and lacquered parts. No. R-48.....\$1.65

SIGNAL HEAVY DUTY KEY

All brass construction with lacquer finish. 1/4 in. coin silver contacts; navy type knob. No. R-63\$2.40
No. R-64—1/4 in. contacts..... 2.55

SIGNAL PRACTICE SETS

R-68—Set consists of a key and an adjustable high frequency buzzer on mahogany finished board on which code is printed. A quality set.....\$2.00

R-69—Code practice set. Consists of a key and a non-adjustable buzzer on a metal base on which the code is printed. Good quality. R-69.....\$1.05

Signal R-60 — Hi-frequency buzzer. Adjustable. Resist. 2 ohms. \$0.85

OFFICIAL BOY SCOUT SIGNALLER

Radio-Blinker-Telegraph — Consists of high pitched buzzer, light blinker and telegraph sounder operated from two No. 2 Burgess flashlight cells. Code is printed on instrument. Sturdy all-metal construction.

No. 1095—Without batteries....\$0.90

NAVY KNOB

You should have one on your key.
No. 360.....\$0.15

BUTT-INS

(BUTTON LEAD-INS)

This is one of the most convenient feed-thru insulators on the market. Although only 5/16 in. diameter they insulate for over 5000 volts at 60 cycles. Are better than porcelain and much more economical. Fit 7/16 in. hole; pass 6-32 screw.

CP-43—Five standard jacks, nuts and lugs for above, net per set... .40

VICTRON "G"

The Magic Insulator of Radio

Victron is one of the most remarkable organic substances yet contributed to radio. It is practically loss free, manifesting no more "response" to high frequency alternating current fields than fused quartz.

Victron may be used to advantage as a material for insulating condensers, switches, sockets, terminals, etc. It may be used to construct inductors which will not rise in temperature, due to dielectric power loss, will provide maximum "Q" and promote circuit performance. For 56 megacycle service or at the higher frequencies it is without equal in its field.

Taylor Tubes

**"More Watts
per Dollar"**

New!—T55

**168 Watts
Output
for Only**

\$8.00

Efficient on all frequencies up to 200 megacycles. Fil. 7.5 volts, 3.25 amps. Max. plate volts 1500 max. Plate current 150 M.A. Plate to grid 2.5 MMF. 55 watts plate dissipation.

756

40 watts plate dissipation — Fil. 7.5 volts—2.0 a m p s., max. plate volts 850 —max. plate current 110 M.A. An extremely efficient doubler or crystal osc. tube. Pair will deliver 100 watts audio in class B. A high mu. tube.

\$4.95

825

40 watts plate dissipation, Fil. 7.5 volts, 2.0 amps., max. plate volts 850, max. plate current 110 M.A. Efficient on 5 to 160 meters.

\$4.95

841A—\$7.00

50 watts plate dissipation. Efficient performance on all bands from 10 to 160 meters. Fil. 10 volts, 2 amps. Max. plate volts 1000. Max. plate current 150 M.A.

203A

\$12.50

**160 Watts Out-
put (Class C)**

100 watts plate dissipation. Efficient on 20-40-80-160 meters. Fil. 10 volts, 3 amps. Max. plate volts 1250. Max. plate current 175 M.A.

Hams who remember our former sales engineer Rex L. Munger (W9LIP) will be pleased to hear that he is now sales manager for Taylor tubes. "We Guarantee Em!" sez Rex.

Guarantee: All Taylor tubes are guaranteed against defective workmanship and material. Any tube which has failed due to mechanical or electrical defects will be replaced if returned direct to the factory.

New! 814

400 Watts only

\$18.50

200 watts plate dissipation. Efficient on all frequencies from 10 to 160 meters. Fil. 10 volts, 4 amps. Max. plate volts 2000. Max. plate current 300 M.A.

600 Watts Audio (2 tubes) 822

Same construction as 814. 200 watts plate dissipation. 600 watts audio in class B. Fil. 10 volts, 4 amps. Max. plate volts 2000. Max. plate current 300 M.A. Efficient on 10-20-40-80-160 meters. A super HD-203A.

Net Price \$18.50

Taylor 866

Half wave mercury vapor rectifier. Fil. 2.5 volts, 5 amps. Inverse peak 7500 volts. Inverse current 600 M.A. Multi strand filament construction.

\$1.65

Taylor 866B

Half wave mercury vapor rectifier. Fil. 5 volts, 5 amps. Inverse peak voltage 8500. Inverse peak current 1 amp.

\$3.00

New! T155

450

Watts

**Output
for Only**

\$19.50

The ideal high power ultra high frequency tube. Fil. 10 volts, 4 amps. Max. plate volts 3000. Max. plate current 200 mla. grid to plate; cap. 3 mmf. Easy to drive. 200 watts plate dissipation.

500 Watts on 5 Meters!

T200

Plate dissipation 200 watts. A high frequency tube for efficient operation on 2½ meters at full input. 600 watts output on 5 meters as a class C amplifier. Large carbon anode, grid leak at side. Plate lead at top.

\$21.50

HD203A—\$17.50

150 watts plate dissipation. Fil. 10 volts, 4 amps. Max. plate volts 2000. Max. plate current 250 M.A. A favorite with many amateurs.

Other TAYLOR Tubes

211—Same general characteristics as 203A except Mu. is lower.

\$12.50

211C—Same general characteristics as 211 except grid to plate capacity is 7 mmf.

\$12.50

F-52—Regular Carbon Anode 852 except has type 50 watt base.

\$15.00

Write Us For TAYLOR Tubes

AMATEUR RADIO TUBES

EXCLUSIVE RCA-DE FOREST TUBE DISTRIBUTORS IN THE NORTHWEST

We are very proud of our appointment as the exclusive distributor of this leading line of transmitting tubes in the Northwest, and we strive hard to merit the appointment by carrying a large stock, offering technical advice and by assisting our customers in every way possible. We stand back of the generous RCA-De Forest guarantee 100% at all times. Our slogan, "When you think of tubes—order from Lew Bonn Co., applies to the transmitting types also.

RAYTHEON AMATEUR TRANSMITTING TUBES

are ruggedly built to give excellent service and long life at full rated output. A type for every amateur need is offered in the list above. We recommend, unreservedly, the use of the **RK20** as a buffer or doubler tubes in medium and high power transmitters. Our experience has proven that the **RK20** is ideally suited for this purpose. The use of the **RK31's** as Class B Modulators is also recommended. They are zero bias tubes giving 125 watts of audio in Class B and are just the ticket for modulating a single 03A. The **RK34** is also showing up well as a crystal oscillator tube. You can't beat Raytheon tubes for outstanding performance.

"EIMAC" TRANSMITTING TUBES

Operating with normal input **Eimac** Tubes are capable of far more output than is generally conceded possible in amateur practice. Plate efficiencies of as high as 75% and more are an everyday occurrence with Eimac tubes. It may be of interest to note that a pair of Eimac 300T's can give an antenna power of 2.5 KW! **IMPORTANT!** Eimac tubes should never be operated with less than rated fil. voltage and 1/2 to 3/4 volt too much is better than .1 volt too little!

WRITE FOR BULLETIN ON TYPE in which you are interested.

NEW EIMAC "35T"

PERFORMANCE!

Plate Voltage	Class "C" R.F. (75% eff.)	Class "B" Audio (2 tubes)

1000 volts	75 watts	115 watts
1250 volts	94 watts	130 watts
1500 volts	112 watts	140 watts
Net price	\$8.00	

The EIMAC "50T"

A medium mu three element tube. High output at audio and radio frequencies up to 75 MC. No "Getter" inside envelope to give off gas when heated. Unusually low plate resistance coupled with mu of 12 makes tube easy to drive to high power output and plate efficiency. Fil. volts 5, fil. cur. 6 amps. Rated, plate dissipation 50 watts; amp. factor 12, normal max. plate cur. 100 M.A. Base UX 4 pin. Max. plate volts, 3,000 V.....\$13.50

EIMAC "150T"

A medium mu, three element vacuum tube for high efficiency and output, as oscillator or amplifier at audio and radio frequencies up to 75 MC. May be used at reduced output, up to 300 megacycles. No "Getter" inside envelope to give off gas when heated. Exclusive design insures high vacuum during tube life. Fil. volts 5, fil. cur. 10 amps. Rated plate dissipation 150 watts; amp. factor 13. Normal max. plate cur. 200 M.A. Base; stand 50 watt. Plate volts 3,000. Normal power output (Class C 75% eff.) 450 watts\$24.50

EIMAC "300T"

Operating with the normal maximum permissible input, the EIMAC 300T is capable of a radio frequency output in excess of 920 watts. This output is obtained at a readily obtained plate efficiency of 75%. Higher plate efficiencies will give correspondingly higher outputs. Filament Voltage (A.C.) 7 1/2 to 8 volts; Filament Current (approx.) 1 1/4 amps.; Amplification Factor (average) 16; Maximum Plate-Voltage 3500 volts; Maximum Plate Current 350 amperes. Net price\$60.00

EIMAC "500T"

500 watts plate dissipation.....\$175.00

BARR DB3 TRANSCEIVER

Class B Modulated

A complete, self-contained ultra H.F. radiotelephone transceiver that has proven to be one of the outstanding units on the market. Beautiful appearance. Output is 10 times more than that of units using only Type 30 tubes. Working range from 2 to 100 miles depending on conditions and elevation of locations. Size 11 in. long, 9 1/2 in. high and 6 1/4 in. wide. Black crackle finish metal case has heavy leather handle. Uses one 30, one 49 and one 19. Comes with complete instructions. Price does not include tubes, batteries, microphone or earphones.

No. DB3.....\$16.20

NEW RCA
5-METER TRANSCEIVER

A complete, readily portable 5-meter radiotelephone transceiver. Uses two 19, one 30 in a Class B circuit that gives maximum output with good quality. Strong, black crackle finish metal case, with heavy leather handle, carries all batteries. This new unit incorporates all the latest features and will give a very good account of itself in actual everyday use, as the workmanship is of the highest order and its construction is of the heavy duty type throughout. Requires three 45-volt "B's," one 7 1/2-volt "C" and two 1 1/2-volt "A" batteries. Comes with complete instructions. Less batteries, tubes, microphone and earphones.

No. ATR-219.....\$19.95

ARHCO DE LUXE RESONANT LINE
OSCILLATOR KIT

Designed by Arthur H. Lynch
This kit will really put out a wallop on 5 meters. 5/8-inch diameter tubes plus high dielectric insulation results in a high "Q" circuit of great stability and high efficiency

Relays - Insulators - Name Plates

STRUTHERS DUNN "DUNCO" RELAYS

This concern is a "specialist" in the manufacture of relays of all types and is one of the largest exclusive producers of relays in the world. All Dunco relays are thoroughly guaranteed.

ALL-PURPOSE RADIO RELAY

Compact size. Has two isolated contacts suitable for operation in high or low voltage circuits, all frequencies as well as 60 cycle or D.C. power circuits. Each contact can be operated separately. Very fine for "keying." Contacts will handle 1,000 volts D.C. at 300 M.A., 250 volts D.C. at 500 M.A., 110 volts A.C. at 6 amps. and 12 volts at 6 amps.

- No. RA1—2½ volts 60 cycle coil (power consumption of coil less than a type 27 tube).....\$2.00
- No. RD1—5 to 6 volts D.C. coil (power consumption of coil less than a type 37 tube).....2.00
- No. RA3—6.3 volts 60 cycle coil (power consumption of coil less than a type 76 tube).....2.00

DUNCO MIDGET KEYING RELAY

Suitable for speeds up to 50 w. p. m. Large silver contacts. Coil consumes 50 M.A. at 110 volts 60 cycles while contacts will interrupt currents of 6 amps. at 110 volts A.C. Contacts are single pole and close when coil is energized. Size 2¼x1½x1¼ inches.

No. ASBX1.....\$3.85

OTHER DUNCO MIDGET RELAYS

- No. ABTX1—S.P.D.T. Double break.....\$3.85
- No. ADBX1—D.P.S.T. Single break.....4.95
- No. CSBX1—S.P.S.B. Double throw.....4.70

DUNCO TIME DELAY RELAY

Comes with a snap-on housing that covers relay completely. This unit is suitable for use with transformers up to 500 watts condenser input or 1,000 watts choke input. Delays plate voltage for 30 seconds after 866 filaments are lit. Size 3x2½x2¼ inches.

No. TD-96.....\$8.80

DUNCO VACUUM TUBE RELAY

No. CXB51—Ultra sensitive, designed for D.C. in coil circuit or A.C. in contact circuit. Coil is 10,000 ohms and will carry 18 M.A. Adjustable. Contacts are rated 2 amps. at 110 volts A.C. Size 2½x2¼x2 inches.....\$5.50

WARD LEONARD UNDERLOAD RELAY

Underload relay. For protection to Class B modulator tubes and transformers when Class C stage drops load due to loss of excitation. Adjustable.

- No. 507-514—Max. 300 M.A.....\$6.00
- No. 507-515—Max. 600 M.A.....6.00

PYREX INSULATORS

Known the world over as the best form of "low-loss" insulators. They cost more because they really are much better than other insulators.

PYREX ANTENNA INSULATORS

- No. 14—Each.....\$0.15

GUARDIAN RELAYS

This is a new line of radio relays especially designed for amateur radio transmitters. They have proven to be very dependable in operation.

100% guaranteed.

MODEL K100 KEYING RELAY

A compact unit, operates from any filament winding from 5 to 16 volts A.C. or from any convenient D.C. source. Relay contacts. Keying contacts are pure silver and will handle up to 5,000 volts at highest possible rate of sending. The speed of this relay together with its strong magnet coil and return spring assure a clean make and break that makes copying easy. This relay may also be used for any circuit control where a single pole, single throw switch is needed.....\$3.30

GUARDIAN BREAK-IN RELAY

Essentially a double pole, double throw switch that is actuated by a control switch in 110 volts A.C. line supplying power to the coil. Is a necessity in remote control operation.

- No. B-100.....\$4.50

GUARDIAN OVERLOAD RELAYS

The best means of protection for tubes, transformers, condensers and meters. Can be mounted on front panel—push a button and circuit is closed. Three types.

- Model L-250—Will break at 250 M.A.\$4.50
- Model L-500—Will break at 500 M.A.4.50
- Model X-100—Universal. Can be adjusted to break at any current from 150 to 500 M.A.....7.20

CUTLER-HAMMER RELAYS

- No. CH381-O—S.P.S.T. Operates on 110 volts A.C. Fine for keying. Open type.\$3.30

- No. CH381-E—Same as above except completely cased.....3.95

METAL RACKS—CANS—PANELS

W9LIP SPECIAL

TRANSMITTER RACKS

The phenomenal success of these racks, pioneered by W9LIP, assure us of their continued acceptance. We guarantee that you will like them and know that when you dress up your rig to look like good old "W9LIP," you will be proud of it.

SIDE PIECES—These metal side pieces are the backbone of your whole rack and panel layouts. As shown in the illustration above these pieces have a bend outward in the front and inward in the rear. This permits the easy fastening of the panels in the front and mounting of any screen desired in the rear. The bend in the rear also will cover any wiring cables from view. These pieces are finished completely in black crystalline.

Cat. No.	H.	D.	Thick.	Price Each Panel	Cat. No.	H.	D.	Thick.	Price Each Panel
SP-A	60	14	in. 14 gauge	<u>\$1.95</u>	SP-EX	21	14	in. 18 gauge	<u>\$0.90</u>
SP-B	60	11	in. 14 gauge	<u>1.85</u>	SP-E	21	11	in. 18 gauge	<u>.75</u>
SP-C	48	14	in. 14 gauge	<u>1.45</u>	SP-F	21	11	in. 18 gauge	<u>.40</u>
SP-D	48	11	in. 16 gauge	<u>1.35</u>					

TOP COVERS—Designed to correctly fit on top of the above sides, furnishing that "complete" appearance to the whole unit. Finished in black crystalline. Two sizes.

ST-G—24x14 in.....\$0.80 | ST-H—16x11 in.....\$0.70

SHELVES—Made of 16 gauge leaded steel. By using these shelves, you get a perfect arrangement for chassis support as well as complete shielding between each chassis unit of your transmitter. These shelves have an upward bend extension in the rear and a down bend in front.

SS-I-1-1x16 3/4 in. \$0.55 | SS-J-9-1 1/2 x 16 3/4 in. \$0.50

CHASSIS—Two types. Aluminum and leaded steel. The aluminum chassis are recommended for R.F. units and the leaded steel for power supplies. Both are supplied in 16 gauge material and are 2 inches deep.

Steel	Aluminum
SC-FS—12x12 $\frac{1}{2}$ in..... \$0.70	SC-KA—12 x12 $\frac{1}{2}$ in..... \$1.25
SC-LS—8 $\frac{1}{2}$ x12 $\frac{1}{2}$ in..... .55	SC-LA—8 $\frac{1}{2}$ x12 $\frac{1}{2}$ in..... .95

BOTTOM SUPPORTS—Made of 14 gauge steel finished in black crystalline. They are constructed so that our side pieces fit right into them—making ideal supports for the whole completed transmitter. These supports are not necessary but go a long way in adding that "factory-built" appearance to the whole layout. They are 20 inches wide and 5 inches high.

No. SE-8—Each.....	\$0.60
--------------------	--------

COMPLETE RACK—To introduce the W9LIP Special Racks, we offer this complete unit at a value-plus price. Includes two SPE—Side Panels; one STH—Top; three SS-J Shelves; two SCL-A—Chassis; two SCL-S—Chassis; one 10x11 in. Panel and three 6x11 in. Panels. Everything necessary for the complete unit—all finished in black crystalline, at the sensational low price of only—No. SVP..... **\$5.95**

METAL PANELS

These panels are unfinished but can be supplied in black wrinkle at slightly higher cost. We considered this advisable so that drilling could be done without marring the finish. Send them to us for finishing after they are drilled. Our wrinkling service is very reasonable.

Specify high or low impedance.

AUDAK No. 2033 Music King

Extra good response—plays up to 12-inch records. Both fast and slow speeds

\$7.25

Specify high or low impedance.

AUDAK NO. HR33

Has special needle ballast for obtaining maximum efficiency from slow-speed records. Plays up to 12-inch records—fast or slow. A very high quality instrument

\$9.85

For broadcast studios—Audak Professional Model. Plays all types transcriptions. Extremely good frequency range. Each

\$26.50

UNIVERSAL STROBO-SCOPE

Shows when used under an AC light, the correct speed for any phonograph turntable. Calibrated for 33 1/3 and 78 R.P.M. Diameter 6 inches....

\$0.15

Send for Universal Catalog if interested in recording.

ASTATIC CRYSTAL PICK-UP

Model S

Very good response from 30 to 10,000 cycles. High impedance (100,000 ohms). Only 2 1/4-oz. pressure on needle point. Non-resonant. This is an extremely high quality pick-up. Two lengths.

Model S-8—8-in. arm.....

\$7.20

Model S-12—12-in. arm.....

9.00

AN EXTREMELY HIGH QUALITY LINE OF PICK-UPS AT LOW PRICES

No. P-W-15—Theatre pick-up arm—15 1/2 inches overall. For both 33 1/3 and 78 R.P.M., no volume control.....

\$5.80

UNIVERSAL FULL FREQUENCY PICK-UP

A high class pick-up for play-back of all types of instantaneous records—especially aluminum, silveroid, etc. Particularly good for transcription work. Should not be used as recorder. Matches input of standard mike transformers—400 ohms. Other inputs on special order. Plays both 78 and 33 1/3 R.P.M.

No. UFP\$9.00

UNIVERSAL CUTTING HEAD AND ARM

A scientific recording head capable of cutting or grooving all types of material. Size but 2 1/4 in. high x 1 in. wide x 3/8 in. thick. Response to input frequency substantially flat from 30 to 8,000 cycles. Furnished in either 15 or 50 or 200 or 400 ohm. Specify which wanted in ordering. Made primarily for use on Professional Recording Machine but is also sold separately for other installations.

Cutting head and arm\$45.00

Cutting head only (shown at right)\$35.00

PATENTED PROCESS ALUMINUM DISCS

Special alloy. Ready for use. Universal aluminum discs are of special alloy, hardness, and surface mirror polished to assure volume, brilliancy and durability with a minimum of surface noise. We recommend the use of cactus on these records.

Phono. Motors - Pick-ups - Needles

GREEN FLYER PHONO. MOTORS

Dual speed, 33 $\frac{1}{3}$ and 78 R.P.M. Governor controlled. Uniform speed. Smooth running induction motor. No brushes or commutator to create radio interference. Silent in operation. Ruggedly built. Heavy cast frame. Oversize self-lubricating bearings. Machined gears sealed in oil. Rubber floating suspension. Will not overheat in enclosed cabinet. For "long playing" or standard records. Mounts in 8 $\frac{1}{2}$ x5 $\frac{1}{2}$ in. cut-out. Motor dimensions overall, 8 $\frac{1}{2}$ x5 $\frac{1}{2}$ ins. Suspends 3 $\frac{1}{2}$ inches below base board. For 105-120 volt, 60-cycle AC. Shipping weight, 16 pounds.

Model D-10—10-in. turntable.....\$9.60

Model D-12—Complete with weighted 12-in. turntable which is essential for satisfactory reproduction of 33 $\frac{1}{3}$ R.P.M. records. Shipping weight, 17 pounds.....\$9.90

Single Speed 78 R.P.M.

Model A-10—Same construction as above. Furnished with 10-inch turntable. Automatic stop not included. Motor dimensions, 6 $\frac{1}{2}$ x3 $\frac{1}{2}$ inches; suspends 3 inches below base board. For 105-120 volt, 60-cycle AC. Shipping weight, 13 pounds.....\$7.50

Single Speed 33 $\frac{1}{3}$ R.P.M.

Model B-12—Same construction and sizes as above. 12-in. turntable.....\$7.80

6-Volt DC. Type

Model 2664—Single speed. 78 R.P.M. 10-inch turntable. Operates from 6-volt storage battery at 2.8 amps. Shipping weight, 3 pounds.....\$12.60

Model 2671—33 $\frac{1}{3}$ and 78 R.P.M. 12-inch turntable. Otherwise same as Model 2264.....\$14.40

PACARD AUTOMATIC RECORD CHANGER

Plays eight 10-inch records automatically on one side; 12-inch records manually. Two-speed motor, 33 $\frac{1}{3}$ and 78 R.P.M. Lever lifts speed quickly. Last record is repeated until turned off. Any record may be repeated or rejected. Governor controlled induction motor. Webster or astatic crystal pick-up. Built-in volume control. Requires space 18 inches long, 5 $\frac{1}{2}$ inches high and 13 $\frac{1}{2}$ inches wide. Weight, 26 pounds. 110 volt, 60-cycle. Model K—Less case.....\$28.35

Model L—Same as Model K but plays eight 10-inch or seven 12-inch records automatically. Requires space 22 $\frac{1}{2}$ inches long, 5 $\frac{1}{2}$ inches high and 16 $\frac{1}{2}$ inches wide. Model L.....\$33.00

UNIVERSAL RECORDING AND PLAYBACK QUALITY PHONO. NEEDLES

No. UA—For simultaneous grooving and recording on blank aluminum discs, should be used at 25° to 28° angle from vertical. Genuine sapphire.....\$2.40

No. UB—For both recording and playback on pregrooved discs such as black composition home recording discs, and pregrooved aluminum. Bent shank provides proper angle when used in 5° cutting head. Sapphire.....\$2.40

No. UD—Special cutting needle for silveroid and semi-plastic materials in which a fine thread is actually cut out of the material. Should be used at a 2° angle from vertical. Point of hardest sapphire, insuring long life.....\$3.60

RAILING SHOE NEEDLE—Used on playback of Silveroid, pre-grooved composition and cellulose records where angularity of lead is less than 30 degrees. Envelopes of 10. Net.....\$0.30

SPECIAL ACETATE PLAYBACK NEEDLE—.004 radius at point. Red shank highly polished. Envelope of 10. Net.....\$0.15

No. URC10—Red Cactus Needle—the most durable non-metallic needle. Plays 5 to 15 records without repointing. Record groove actually improves each time used. Envelope of 10.....\$0.60

WRITE FOR SPECIAL TECHNICAL UNIVERSAL BULLETIN IF INTERESTED IN PROFESSIONAL RECORDING.

R.C.A.-VICTOR RECORD PLAYER

An inexpensive instrument built by R.C.A.-Victor. Makes an ideal record player for use in adapting radio sets to fine phonograph performance. May be used in conjunction with the R.C.A. RK24 Phonograph Oscillator, or may be directly connected to the radio receiver. In sets with low audio gain the Oscillator must be used. The ready portability of the R.C.A. Record Player also adapts it for effective use with portable AC. operated sound equipment.

PORTABLE—ELECTRIC OPERATED

The R.C.A. Record Player consists of an electrically driven, constant speed turntable capable of playing either ten or twelve-inch records, and a modern electrical pickup. Motor operates on 110 volt, 60-cycle current. A volume control extends out of one end of the case.

CAN BE USED WITH ANY RADIO RECEIVER

Sell extra entertainment profitably by means of the R.C.A.-Victor Phonograph Record Player. Easily connected to any radio receiver. Housed in an attractive walnut finish chest, only 10 $\frac{1}{2}$ x8x5 inches.....\$10.90

R.C.A.-VICTOR ELECTRIC PHONOMOTOR & TURNTABLE NO. 9038 110 V.-60 CYCLE

A valuable unit in compact size. Hand starting. Synchronous motor. 7 ins. diameter, 2 $\frac{1}{2}$ ins. deep. Plays 10 or 12-in. records at standard speeds.

No. 9038.....\$4.80

R.C.A.-VICTOR PICK-UP AND ARM

For use with R.C.A. turntable No. 9038 or any other small size turntable. Arm length 7 ins. This pick-up gives very good quality reproduction. Coil impedance, 2,500 ohms. 78 R.P.M. only. No. 6592.....\$3.00

R.C.A.-VICTOR 2-SPEED PICK-UP

A counter-balanced magnetic pick-up. Used in 1934 R.C.A.-Victor Model 331 Radio Phono. Combination. Has frequency response flat from 50 to 5,000 cycles at impedance of 28 ohms. The arm is counter-weighted for both the 33 $\frac{1}{3}$ and 78 R.P.M. records, and is mounted on a special rubber cushion. The complete assembly consists of Pick-up Head No. 6542, Pick-up Arm No. 6543 and Escutcheon No. 3779.

No. R123P—Complete Assembly as listed above.....\$5.10
No. 6542—Head only.....2.50

R.C.A.-VICTOR PHONO. NEEDLES

STEEL—3 sizes: Half Tone, Full Tone and Extra Loud Tone. 100 needles to envelope (except 75 in Half Tone). Per envelope.....\$0.10

CHROMIUM—A new Victor development to fill the need of a sturdy, semi-permanent needle. Two types: One type (with green shank) for use with 78 R.P.M. records; the other type (with orange shank) for use with 33 $\frac{1}{3}$ R.P.M. records. 6 needles in container.....\$0.20

TUNGSTONE—Semi-permanent needles. Two types: Full Tone and Extra Loud Tone. 8 needles in container.....\$0.20

HOME RECORDING—For recording and reproducing R.C.A. home recording blanks. 8 needles in container.....\$0.20

SHADOWGRAPH—A steel needle for use in theatres and broadcast stations. 100 for.....\$1.00

RCA PHONOGRAPH OSCILLATOR

A simple device for broadcasting records into your radio receiver. Excellent tone quality, easily and quickly installed and works perfectly with all pickups. Uses either 2A7 or 6A7 tube. Includes radio-record switch and special connectors for obtaining power.

No. 9554—List price (less tube)....\$4.65

ASTATIC THE NEW IMPROVED ASTATIC D104 CRYSTAL MICROPHONE

*Acclaimed the Most Practical Microphone
Increased Frequency Response*

No adjustment required.
No carbon rush.
No packing.
No blasting.
No freezing.
No button current.
No field current.
No polarizing voltage.
Connects direct to grid or through matching transformers.

Only genuine Brush Bimorph crystals used, output level, —60 db.
Finished in chromium, 3 inches in diameter, 1 inch thick, 8-foot shielded cable.....\$13.50

The new, improved Astatic D104 is offered in a 2-wire shielded cable model for use with push-pull amplifiers, 25 feet of shielded cable furnished.
Model D104P—Net\$15.00

ASTATIC D104HS HAND TYPE CRYSTAL MICROPHONE

Same microphone exactly as in the new, improved D104, with 8 feet of shielded cable.
D104HS—With handle switch..\$15.30
D104H—No switch 15.00

ASTATIC HIGH FIDELITY DUAL DIAPHRAGM CRYSTAL MICROPHONE

Designed so that the forces of two opposed diaphragms are applied to one crystal. Increased output, rated at 64 db. Frequency response is flat from 20 to 5,000 C. P. S. with a gradual rise to 10,000 C. P. S. Is absolutely non-directional. Comes equipped with substantial locking type plug-in socket, fully shielded. No input transformer needed—connects direct to grid of amplifier. This microphone is recommended for broadcast stations, public address systems, etc. Comes with 8 feet of 2-wire shielded cable. Size 2½ in. high, 1½ in. O. D.
Astatic Model K-2.....\$22.50

ASTATIC CRYSTAL LAPEL MICROPHONE

A high fidelity microphone. Response flat to 6,000 cycles. Size 1½ in. diameter, ½ in. thick. Same acoustic principles as Model K-2. Output —60 db. Weight 1¼ oz. Finished in dull black and furnished with 25 feet of shielded cable.

Model L-1\$15.00

ASTATIC WATCH CASE MODEL D2 CRYSTAL MICROPHONE

The D-2, recently introduced, has won the hearts of every user of microphones where public appearance is made. Utilizing the same exclusive **Dual Diaphragm** principle and **Grafoil Bi-morph Crystal** element as the K-2, it is designed like a watch—the same shape and size—and is not only a work of art to look at but does not obstruct the face of the performer.

Essentially **Non-directional**, it has a frequency response substantially flat from 50 to 6,500 c.p.s.—an output of -60 decibels—and a definitely reduced feed back tendency.

Case is only 2½ inches in diameter and ¾ inch thick with bright chromium finish; total net weight only 9 oz. exclusive of cable; built to stand shock far beyond the ordinary. Adapter threaded ⅝-inch x 27 threads per inch for stand mounting; 8 feet of single wire shielded rubber covered cable which may be threaded through stand or outside.

MODEL D2

Net price..\$15.00

SHURE MICROPHONES

CRYSTAL (Piezo-Electric) TYPE

MODEL 74B "SPHEROID"

For the first time—a crystal microphone combining High Output Level, true "Wide-Range" Reproduction and Non-Directional Pickup! Sound reaches the small Curvilinear diaphragm through a complete angle of 360 degrees with a frequency response from 40 to 10,000 cycles. Response is non-directional for sound approaching from any angle. Special "Grafoil" Bimorph Crystal, "Cantilever" actuated, lowers cable losses. Overall diameter 2½ in. Rubber-black finish with chromium circles. Furnished with new locking, shielded, moisture-proof 3-conductor plug, convertible receptacle for stand or suspension use, and cable strain relief. (No cable furnished—see C10A and C20A listings.) Net weight, 7½ oz. Shipping weight, 1 lb. Model 74B. "Spheroid" Crystal Microphone.

Net price \$22.50

MODEL 75A SPHERICAL CRYSTAL MICROPHONE

A new economical Shure Non-Directional Crystal Microphone with wide-range response! Acoustic streamlining and scientific placement of the small curvilinear diaphragm insure non-directional response for sound approaching from any angle. Crystal element is a genuine "Bimorph" unit, "Cantilever" actuated. Only 2½ in. in diameter. Rich rubber-black finish. Mounts on any Shure Stand. Complete with "side cable outlet" and 25 feet of shielded single-conductor rubber jacketed cable. Shipping weight, 1½ lbs.

Model 75A—Spherical Crystal Microphone. Less Stand. Net price.....\$19.20

CRYSTAL MICROPHONES MODEL 70H

The Shure 70H sets the "standard of performance" for diaphragm type crystal microphones. Adopted by leading Sound - Equipment Manufacturers, "Curvilinear" diaphragm and "Bimorph" crystal, "Cantilever" actuated. Beautiful cast case, chromium-plated overall. Mounts direct on any Shure Stand or in carbon ring. Cable may be brought through stand tubing or outside as desired. Complete with removable "close-fitting" ring, 4 "Quickway" Hooks and shielded single-conductor rubber jacketed cable.

Model 70H—Cable lgth., 7 ft. Code, Rubab. Shpg. wt., 1½ lbs. List.....\$13.50
Model 70H-25FT—Cable lgth., 25 ft. Code, Rurov. Shpg. wt., 2 lbs. List \$14.58
Model 70H-35FT. Cable lgth., 35 ft. Code, Ruriz. Shpg. wt., 2½ lbs. List.....\$15.20

Model 70H—Cable lgth., 7 ft. Code, Rubab. Shpg. wt., 1½ lbs. List.....\$13.50
Model 70H-25FT—Cable lgth., 25 ft. Code, Rurov. Shpg. wt., 2 lbs. List \$14.58
Model 70H-35FT. Cable lgth., 35 ft. Code, Ruriz. Shpg. wt., 2½ lbs. List.....\$15.20

Model 70HK—General purpose type. Consists of Model 70H microphone, 25 feet single conductor cable, handle, adapter, and chrome plated base. Shipping weight, 2 lbs. Net, each.....\$16.50
Model 70SK—Communications type. Consists of Model 70S microphone (recommended for voice range only) instead of Model 70H. Otherwise same as 70HK. Excellent for amateur use. Shipping weight, 2 lbs. Net, each.....\$15.60
Model 10BK—Double button carbon mike. Model 10B microphone with special handle, 6 feet 3-conductor cable, adapter and chrome plated base. Shipping weight 1½ lbs. Net, each.....\$7.20

MODEL 73A LAPEL

Highly efficient and faithful in voice reproduction, due to new Shure diaphragm design and improved mechanical system. Free from "background" noise and vibration pickup. Diameter only 2 in. Weight, less cord, under 2 oz.! Baked rubber-black finish. Equipped with special spring lapel clip and 25 feet of shielded single-conductor black mercerized cotton-covered cordage. Shipping weight, ¾ lb.

Model 73A—Price.....\$15.00

THE NEW SHURE "ULTRA" WIDE-RANGE CRYSTAL MICROPHONES

Ultra "wide-range" reproduction from 40 to 10000 cycles. New cruciform crystal mounting makes possible a higher output rating than on any previous diaphragm types of similar frequency characteristics. Dual-drive Grafoil Bimorph crystal. Curvilinear diaphragm. Complete barometric compensation—moisture sealed.

Model 700A—Small compact fitted with swivel and finished in polished chrome. Shipping weight, 1½ lbs. Net each \$15.00
Model 701A—Grille type. Contrasting finish of polished chrome and rubber black. Shipping weight 1 lb. Net, each. \$15.00
Model 702A—Spherical type finished in rubber black with bright chrome band. Shipping weight 1 lb. Net price, each\$15.00

VOLUME CONTROLS FOR CRYSTAL MICROPHONES

Now, for the first time, speakers, soloists, and announcers can control the volume of a crystal microphone.....

smoothly.....noiselessly.....with complete freedom from unwanted "tone-control" effects! A new capacity attenuator, developed by Shure engineers, has made this possible. The unit is small and compact (4 by 2 by 2 inches) and mounts on any Shure Stand. Finish is standard rubber black with chrome and black "Volume" escutcheon. Convenient On-Off switch. Independent of volume control is provided. Cable may be run through stand tubing if desired.

Shure Volume Controls are supplied in two types: "Demountable," with receptacle for 74B and 70H-79AC microphones, and "Coupling" type threaded ½ in.—27 for Model 70H. Both types are supplied with 25 or 50-foot lengths of single conductor, rubber jacketed shielded cable. For best results the cable should not be lengthened or shortened—use the full length supplied with the unit.

Model V21A—Crystal Microphone Volume Control. "Demountable" type with 25-foot cable. Shipping weight, 2½ lbs. Price.....\$7.50

Model V22A—Crystal Microphone Volume Control. "Demountable" type with 50-foot cable. Shipping weight, 3½ lbs. Price.....\$9.00

Model V11A—Crystal Microphone Volume Control. "Coupling" type with 25-foot cable. Price.....\$7.50

Model V12A—Crystal Microphone Volume Control. "Coupling" type with 50-foot cable. Price.....\$9.00

CARBON TYPES

MODEL 3B TWO-BUTTON

Advanced engineering and controlled quantity production have made possible this full-size two-button microphone with quality performance never before available at such extremely low cost! Designed for spring suspension. Rigid cast frames and built-in protective grill, finished in bright nickel plate overall. Has the well-known Shure "Quickway" hooks. May be used as a single button microphone. Frame diameter, 3 inches. Net weight, ¾ lb. Shipping weight, ¾ lb.

Model 3B—Two-button. Price.....\$3.30

Model 10B—Convertible Hand Microphone. Convenient general purpose P.A. microphone, convertible from hand to 3B type for stand mounting by removing mounting ring and inserting four "Quickway" hooks. Black enameled handle. Overall length, 8½ inches. Net weight, ¾ lb. Shipping weight, 1 lb. Complete with 6 feet of three-conductor cable and 4 "Quickway" hooks. Price \$6.30

MODEL 5B TWO-BUTTON

A full-size two-button microphone (diameter over-all 3½ inches, thickness 1-1/16 in., weight 15½ ozs.) Regular full-size precision adjustable buttons and special diaphragm assure exceptional quality of reproduction. Ideal for low cost sound systems. Attractive modern design, finished in chromium plate. Screen-protected diaphragm and "Quickway" hooks. Shipping weight, 1½ lbs.

Model 5B—Price.....\$6.00

MODEL A80A STAND SWITCH

New handy stand-mounting on-off switch which can be used with any type microphone. Small attractive cast-aluminum case, with rubber-black enamel finish. Standard ¾-inch—27 thread fits all Shure Stands. Over-all height, 2½ inches. Shipping weight, ¾ lb.

Model A80A—Stand Switch. Price.....\$1.50

DEDUCT 2% FOR CASH WITH ORDER

AMPERITE—Electrovoice Velocity Microphones

NEW! RB TYPES All High Impedance

Compact, Streamline, Modern. Embodies the latest and best technique in microphone design. Gives studio type reproduction. Unexcelled for quality, fidelity and ruggedness!

Features: 1. All-cast case, achieving maximum ruggedness. 2. Acoustically designed to eliminate any possibility of cavity resonance. 3. 8 db. higher output. 4. Triple shielded. 5. Switch. 6. New cable clamp. **RBMn** (High Impedance). 2,000 ohms. Excellent for speech and music. Permissible cable length up to 125 feet. Output —60 db. Frequency response 40-11,000 c.p.s. Complete with shock absorber, switch, 25 ft. cable. Obtainable without switch upon request. Shipping weight 5 lbs. Available in low impedance models (200 ohms).

Models **RBMn** and **RBBn** (beam type)

Gun metal. Net price..... **\$25.20**

Chrome. Net price..... **\$25.80**

Model RB-DIn—Dual impedance for low or high impedance amplifiers. Can be used with high impedance input with S.C.S. cable lengths up to 125 feet—or low impedance input with D.C.S. cable lengths up to 2,000 feet. Just plug in the proper cable. No dead windings or taps, therefore, maximum efficiency for low or high impedance connection. Shipping weight, 5 lbs. Switch cannot be furnished on Model RB-DIn.

Dealer cost **\$27.00**

NEW MODEL RAH

A specially designed microphone built to Ampertite standards which can be used for both speech and music. No peaks. Flat response over audible range. Output —68 db. Triple shielded. Shock absorber. Swivel bracket. Shipping weight 5 lbs.

Model RAH (2,000 ohms). High impedance with 12 feet of cable.

Gun metal. Net price..... **\$12.94**

Chrome finish. Net price..... **\$13.53**

AMPERITE JUNIOR (LAPEL) VELOCITY

Size of a match box. Ideal for lectures, specialty acts and "walking" after-dinner speakers. Can be hidden under coat. Output is constant with any position of the head. Transformer included in microphone case. Frequency response, 60-7,500 c.p.s. Size 2 1/4 x 1 1/4 x 3/4 inches. Shipping weight 2 lbs.

Model 7J (200 ohms) or **Model 7J-H** (high impedance) with 25 feet of cable.

Dealer cost **\$18.00**

INPUT TRANSFORMER (CABLE TYPE) LGP

Enables the use of low impedance microphone with amplifiers having high impedance input. Microphone cable can be any length up to 2,000 feet. Hum trouble is eliminated by special balanced windings. Will withstand mechanical abuse. Can be used with 25, 50 or 200-ohm microphones. Output connects directly to high impedance input.

Model LGP (Standard) 60-8,000 c.p.s. Net price..... **\$3.00**

Model LGP (Laboratory). 40-14,000 c.p.s. Net price..... **\$6.00**

ATTENTION!

Customers south and east of St. Paul will find our St. Paul store very conveniently located right on Route 12—just two blocks up the hill toward the State Capitol from the Golden Rule and Emporium. We carry a complete stock at the St. Paul store and you will always find room to park. We feel sure you will like the service you get at the St. Paul store—try it the next time you come to the Twin Cities.

ELECTROVOICE "K" SERIES (All High Impedance)

Model K-20—America's lowest priced velocity microphone, with typical ELECTROVOICE quality. Recommended amplifier gain: 120 db. Equipped with locking cradle, 10-foot cable.

Net price..... **\$11.70**

Model K-21—An exceptional value. Provides relatively high output with quality. Recommended amplifier gain: 110 db. Finished in black and chromium. Equipped with locking cradle and 10-foot cable.

Net price..... **\$14.70**

Model K-22—The finest in this series, second only to the "V" series. Has excellent quality and even higher output than the K-21. Recommended amplifier gain: 105 db. Finished in chromium with black trim. Equipped with locking cradle and 10-foot cable.

Net price..... **\$17.70**

ELECTROVOICE "V" SERIES (All High Impedance.)

Model V2HIZ—One of America's most popular microphones. Excellent for music or speech. Output: —68 db. Equipped with 20-foot cable.

Net price..... **\$21.00**

Model V3HIZ—A high output, high quality microphone for ultra-faithful public address, recording and communication. Equipped with cradle, swivel and shielded plug. Output: —66 db.

Low impedance types available. Specify when ordering.

NO. 100—"OLD FAVORITE"

A medium small high quality two button mike. High sensitivity results from correct damping. Extremely low hiss level, acid-treated granules reduce ash content, increase their life and allow higher current. Chrome finish.

\$6.00

The models listed here are designed to meet any application and are available from our stock:

Model 100D—Standard—medium sensitive.

Model 100B—Medium damped.

Model 100C—Heavily damped.

NO. 88—TWO BUTTON

You get "condenser mike" reports when you use a No. 88. This is an extra high quality mike that can be used under the most exacting conditions, has all features, and more, that are incorporated in much higher priced mikes. Response 30 to 7,000 cycles.

\$15.00

MODEL 77—TWO BUTTON

200 ohms per button. Here is a mike that is really pleasing everyone that buys it. If you want a mike that has REAL QUALITY plus durability, you can bank on the Model 77. Frequency response 40 to 6,500 cycles. Removable buttons—air damped.

BRUSH CRYSTAL MICROPHONES

Considered by experts to give the finest reproduction of any microphones made. Finest studio quality. New Brush Sound Cell Microphone for P. A., amateur and remote broadcast pick-up use. Frequency response 50 to 11,000 C. P. S. Output—71 db. Size 4 1/4 x 1 1/2 x 3/4 inches. Weight 3 oz. Furnished with 15-foot shielded cable. High impedance—direct to grid type.

No. B2S\$27.00

MICROPHONE SADDLE

A dandy support for crystal mikes—tilts to any angle and locks in place. Aluminum. Chrome plated.
No. FU700\$1.20

TURNER MODEL 38 Non-directional

Model 38 has an excellent frequency response, flat from 500 to 7,000 cycles with a rising low frequency characteristic of approximately 5 db. at 50 cycles. Average output, 60 db. Very low feed back due to new design principle.

Model 38—Mike only with 8 feet cable\$13.50
Model 38-B-3—With desk stand\$15.00

TURNER HI-LEVEL MASTER MODEL

Due to its tremendously improved frequency response and rugged construction, the Hi-Level Master Model 24 replaces the popular type "G" Turner microphone. Much research and development has gone into the making of a truly Hi-Fidelity general purpose unit. Every requisite of a high class microphone has been incorporated in this

model. The excellent flat frequency response with high output level has given this unit an enviable position in its field. This model has a frequency response flat from 500 to 6,000 cycles with a rising low frequency characteristic of approximately 5 db. at 50 cycles. Output 54 db.

Model 24—Mike only with 8 feet cable\$13.50
Model 24-T-1—With desk stand.... 15.00

TURNER MULTI-CRYSTAL MIKES

All are basically flat from 40 to 7,000 cycles with a slight rising characteristic from 7,000 to 10,000 cycles, which is particularly favorable in offsetting the falling characteristic of most amplifiers at these frequencies. Single ended models are offered in four, six and eight crystals. Push pull models are also offered in four, six and eight crystals.

FEDERAL DE LUXE MICROPHONE STAND

Model FE-60

Model FE-60 is truly a de luxe stand in every sense of the word. Hand spun shell, brass tubing and fittings are triple chrome plated, enhancing the durability and beauty of this sturdily built stand.

The cast iron base which is ten inches in diameter and weighs eleven pounds makes the stand stable and prevents tipping. The six rubber feet on which the base is mounted eliminate all vibrations.

The most distinctive feature of all our microphone stands is the "Holdfast" adjustment on the elevation rod. No set screw is required. Simply raise or lower the rod to the elevation desired and it will remain in a set position until manually changed.

Extends to 69 inches and comes equipped with ball socket swivel joint. Price does not include ring.

For all practical purposes these 10 and 12 inch speakers will do everything expected of a regular dynamic speaker of the field type with the many added advantages the PM offers in weight, ease of wiring, etc. The PM 10C is rated at 8 watts of continuous audio output, the PM 12C at 8 watts, the PM 12B at 8 to 12 watts and the PM 12A at 12 to 18 watts. The PM 12B and PM 12A are available in high fidelity models at no extra cost. For regular P.A. work it is recommended the operator use the standard models listed.

CABINET MODEL 8½-INCH MAGNETIC SPEAKER

60-WATT AMPLIFIER

WEBSTER-CHICAGO

6-VOLT AMPLIFIER

MODEL 4P-60 USING 6L6 TUBES

The 4P-60 Amplifier has been designed around the 6L6 tube. Adequate factors of safety have been employed throughout.

Amplifier 4P-60 is furnished with a four position electronic mixer with four input controls and master control (noiseless). The output terminates in a 7 prong receptacle plug which is supplied.

Will supply one to ten permanent magnet speakers.

The amplifier is contained in a metal case with rounded corners and neutral tone japanned finish. The case is well ventilated and equipped with carrying handles. Case size is only 9 in. x 16½ in. x 19 in. and weighs 57 lbs.

POWER OUTPUT—60 Watts.
GAIN—143 db.

OUTPUT IMPEDANCES TAPPED AT 2, 4, 6, 8, 16 and 500 ohms.

HUM LEVEL minus 20 db.

AMPLIFIER SIZE—9 in. x 16½ in. x 19 in.

NUMBER STAGES—5.

TUBES—4-6C6, 2-6A6, 1-76, 1-6E6, 2-6L6, 1-83, 1-5Z3. (All tubes furnished with amplifier.)

Model 4P-60

Amplifier only. Complete with radio tubes and receptacle plugs.

List price\$195.00

MODEL MV-410 6-VOLT — 10-WATTS

System MV-410

Complete with amplifier, crystal microphone—hand-type, heavy duty speaker with aluminum directional sound projector and mounting bracket.

List price\$102.50

System MV-410S

Same as described above but with two 10-in. heavy duty speakers mounted in aluminum directional sound projectors.

List price\$133.75

SPECIFICATIONS

POWER OUTPUT—10 Watts.

POWER REQUIRED—8 amperes.

OUTPUT IMPEDANCES—Input for crystal microphone, Output for 1 or 2 speakers.

AMPLIFIER SIZE—7 in. x 7½ in. x 12 in.

NUMBER STAGES—3.

TUBES—16C6, 3-6A6 (Tubes furnished).

MICROPHONE—Hand type crystal microphone, 25 feet of flexible rubber covered cable.

SPEAKER—10 in. Heavy Duty Electrodynamic Unit. Sound Projector of spun aluminum with bracket. 15 feet of flexible rubber covered cable.

COMPACT HIGH FIDELITY

PREAMPLIFIERS

HUMLESS A.C. OPERATED

MODEL 21C MIXER-PREAMP.

(Illustrated)

The Type 21C is a two stage amplifier for two high impedance microphones, each having a separate mixer tube. The two gain controls are located after the first stage, resulting in very quiet operation. The input tubes are cushioned on rubber preventing vibration and microphonics from affecting them.

The cast cases on the transformers, the complete electrostatic shielding of all parts, and a five section filter in the "B" supply completely eliminate all hum from this amplifier.

Technical Information

Power Supply—110 volts, 60 cycles—12 watts.

Gain—65 db. on microphone input, 30 db. on phonograph input.

Tubes—Three type 75 tubes, one type 84 tube.

Input for all high impedance microphones.

Input Connections—Two jacks for microphones, one jack for phonograph pickup. When the phonograph plug is inserted, one microphone input is disconnected.

Output Impedances—200 and 500 ohms.

Output Connections on screw terminals under removable cover plate.

Dimensions—15x7x4 inches.

Shipping weight 13 pounds.

List price, less tubes\$47.50

Complete set R.C.A. tubes..... 4.25

MODEL 11A for diaphragm crystal mikes

A smaller unit designed for feeding a high output crystal or ribbon mike into any power amplifier with sufficient gain for a carbon mike.

When supplied with low impedance output it feeds into the regular carbon mike input of the power amplifier.

When supplied with 10,000 ohm output it may be fed directly into grid. The outside appearance is the same as the 13C except that it is smaller.

Technical Information

Power Supply—110 volts, 60 cycles—7 watts.

Gain—35 db.

Frequency Response—Less than 2 db. variation from 30 to 10,000 cycles.

Tubes—One 75, one 84.

Output Impedance—200 and 500 ohms standard.

Dimensions—9½x6x3½ inches.

Shipping weight 10 pounds.

List price, less tubes.....\$29.85

With 10,000 ohm output..... 32.50

Complete set R.C.A. tubes..... 2.25

MODEL 13A High or Low Impedance

The Type 13A Amplifier is designed for use in the many places where a low level microphone cannot be connected to the power amplifier because the microphone is too far from the amplifier, or the power amplifier has too low a gain to operate a crystal or velocity microphone satisfactorily. It is ideal for use in replacing the carbon microphone on the older type public address systems with a new high fidelity microphone.

Technical Information

Power Supply—110 volts, 60 cycles.

Power Consumption—10 watts.

Gain—65 db. Maximum Output—Plus 6 db.

Tubes—Two 75-type tubes, one 84-type tube.

Input Impedances—50 ohms, 200 ohms, and 5 megohms.

Output Impedances—200 ohms and 500 ohms. Output connections on screw terminals.

Frequency Characteristic—Less than 2 db. variation from 40 to 10,000 cycles.

Dimensions—15x7x4 inches.

Output Impedances—200 ohms and 500 ohms. Small additional charge for other impedances. Output connections on screw terminals.

Shipping weight 15 pounds.

13A—List price, less tubes.....\$43.50

13B—Identical to 13A except for the addition of a ladder type gain control. List price, less tubes 47.50

13C—Identical to 13A but with high impedance input only. List price, less tubes 39.50

13D—Identical to 13A except for added ladder gain control and with high impedance input only. List price, less tubes..... 43.50

Complete set R.C.A. tubes..... 3.25

A T R INVERTERS

PROVEN—DEPENDABLE—GUARANTEED

A simple, inexpensive device for producing standard 110-volt alternating current from 6-volt storage batteries. 32-volt farm plants, and 110 D.C. systems. No need to purchase special appliances! The ATR D.C.-A.C. Inverter will supply regular A.C. power for operating standard A.C. devices at an efficiency of approximately 80%; the current input being proportional to the load. There are no rotating parts, and the only element that moves

is the vibrator which plugs in just like a radio tube.

SECURITY HIGH VOLTAGE FILTER CONDENSERS

These high quality oil-filled condensers are thoroughly guaranteed for six months at their rated voltages. Their appearance is exactly the same as the illustration—heavy metal container with ceramic stand-offs. For universal use wherever high voltage condensers are needed. Your money cheerfully refunded if you are not satisfied with these condensers. Hundreds in use in the Northwest—ask the next Ham you work—he's probably using one or more already. Furnished in the new medium size containers, 4 1/4 inches high.

HOW TO ORDER

PARCEL POST RATES EXPRESS CHARGES

HOW TO ORDER

Print your order always. Be sure your name and address are on your order. Use our catalog numbers or give FULL details on the item you want. State whether or not we may substitute if the part you want is not in stock. We guarantee to send equal or better quality parts.

SIZE OF ORDER

It is impossible for us to handle mail orders of less than \$1.00 without losing money. Therefore, on any order amounting to less than \$1.00—ADD 15 CENTS IN ADDITION to merchandise price and carrying charges. On your small orders you can evade this by adding a tube or two to the order.

TERMS

You may deduct 2% for cash with order on all orders for more than \$2.00 and we will deduct 2% on all C.O.D. orders for \$3.00 and over. This applies to all merchandise in this catalog except National Co. amateur apparatus. Prices shown on National are "Net"—no further discounts allowed. On all orders of less than \$1.00 we charge a 15-cent handling charge.

FAST DELIVERY SERVICE IN TWIN CITIES

We use a commercial delivery service that gives very prompt service. We can get merchandise to any part of Minneapolis or St. Paul within two to three hours. If you can't come over, telephone, and have your order delivered. Orders amounting to over \$3.00 will be delivered free.

Minneapolis
MA in 5313

St. Paul
GA rfield 2100

ADJUSTMENTS

Do not return anything without sending a letter the same day—do not attach letter to the package. Explain fully why you are making the return and how you want the transaction handled—credit or replacement. Always give date and invoice number on which you purchased this material.

REMEMBER—We insure all packages, so add 5 cents to all shipments of less than \$5.00—10 cents to all shipments of less than \$25 and 15 cents to orders less than \$50. In other words—the carrying charges of all shipments should include both parcel post AND insurance charges. If you do not include enough money for carrying charges, we will ship your orders express collect.

ALL PRICES CONTAINED IN OUR CATALOG are subject to change without notice.

CANADIAN DUTIES

The duty on Canadian shipments is 25% of the value of the order. On freight shipments, a sales tax of 6% of the value (plus the duty), and an excise tax of 3% of the value (plus duty), applies. On Parcel Post or express shipments the excise tax does not apply. It is not necessary to send this money to us as the charge is made when the package is delivered.

Example: Value of shipment.....\$ 80.00
Duty 20.00
\$100.00

The sales tax will be \$6.00 and the excise tax will be \$3.00 additional if shipped by freight.

AMERICAN BROADCAST**

MODEL 42 5-TUBE, 6-VOLT

No "B" Batteries

Tunes from 1600 Kc. to 540 Kc. with automatic volume control, tone control, 8-in. magnetic speaker, automatic dial lite, and plug-in primary vibrator. Due to the use of newest tubes the battery drain is less than 1.7 ampere.

Tubes: 1-6D8G, 1-6S7G, 1-6Q6G, 1-41, 1-19.

Model 42.
List price, \$39.95. **\$19.95**
Dealer net cost..

MODEL 52 6-TUBE, 6-VOLT

Two Bands

Tunes from 18 M.C. to 5.5 M.C. and from 1800 Kc. to 540 Kc. Automatic volume control, tone control, 8-in. dynamic speaker, synchronous plug-in vibrator. Due to the use of two-volt tubes the battery drain of this model is as low as the 5-tube and less than 1.7 ampere.

Tubes: 1-1C6, 2-1A4, 1-1B5, 1-30, 1-19.

Model 52.
List price, \$49.95. **\$24.95**
Net price.....

MODEL 33 9-TUBE, 32-VOLT

No Vibrator

Tunes from 1600 Kc. to 540 Kc. with 3-gang condenser. Full A.V.C., tone control, 8-in. dynamic speaker, and having the unusually low current consumption of 45 watts. The 32-volt supply furnishes the "B" current direct in this receiver.

Tubes: 2-78's, 1-6A7, 1-75, 1-37, 4-25B6 beam power output tubes.

Model 33.
List price, \$39.95. **\$23.98**
Net price.....

TIGER BATTERY MODEL

Two Bands

An unusually sensitive and selective receiver which is completely portable in every sense of the word. The sensitivity is better than 30 microvolts and the output great enough for room volume. A battery saver device is installed in the rear with an adjustable knob to advance as the batteries age. Uses new permanent magnet dynamic speaker and tunes from 4300 Kc. to 540 Kc. continuous in 2 bands.

Batteries used: 3 No. 6 dry cells and 3 No. 762 Eveready Portable "B" batteries.

SIX TUBE A.C.-D.C. "DICTATOR"

American Broadcast

In a beautiful American veneer walnut of smart modern design with unusual vertical grilles and rounded top and lustrous hand-rubbed piano finish. This receiver's attractiveness cannot be equalled. It incorporates a 5-inch full dynamic speaker and tunes the American broadcast and upper police bands. 550 Kc. to 1750 Kc. No antenna is necessary as it is furnished with the receiver in the form of a braided lead already attached and the extreme sensitivity of the receiver will bring in plenty of distant stations.

Model
DICTATOR.
Net price..... **\$11.95**

ONYX

Model 366X.

List, \$19.95.

Net **\$13.95**

The powerful receiver uses 6 modern tubes with a super audio circuit that contains every advantage . . . tremendous volume . . . super audibility . . . exceptional tone . . . surprising range. Tubes: 6C6, 6D6, 43, 25Z5, 76, 185R8.

Tunes from 175 to 550 meters, with full power at all frequencies. Brings in standard broadcast and those police calls that come in on the 175 to 200 meter range.

The speaker is a full sized electro-dynamic of ultra-sensitive type. Reproduces with exceptional fidelity, full power and excellent tone.

The cabinet is cleverly constructed of molded Bakelite in permanent onyx or walnut . . . conveniently compact . . . only 10½ in. long; 6¼ in. high; 4¾ in. deep.

Operates on 110 volts A.C.-60 cycles, or 110 volts D.C. Built-in antenna contained within the set . . . no outside aerials are required.
